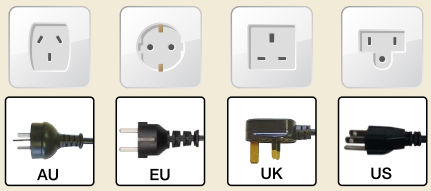
NEW PRODUCTS

KEW 4506
INTELLIGENT SOCKET TESTER

- Perfect socket tester that finds out the diffcult-to-detect N-E Reverse connection
- Easy measurement by simply plugging into a socket outlet and pressing the test button
- KEW 4506 can be used on TT earth system and combined with KEW 8343, also on TN-S (See measurement principle)

P.73

Applicable to the socket outlet types of each country



KEW 8343
SIGNAL SOURCE FOR INTELLIGENT SOCKET TESTER

Standard Type

KEW 8031
Phase Indicators

CE Type

- Long selling models were renewed with the design and the measurement category
- Check of open phase and phase sequence are possible in one unit
- Measuring range for 3-phase installations from 110V to 600V

P.77

CONTENTS

SYMBOLS

- TRUE RMS — TRUE RMS
- CAT Ⅳ 600V — CAT Ⅳ 600V
- DC AC V — DC/AC V
- DC AC A — DC/AC A
- DC V — DC Voltage
- AC V — AC Voltage
- DC A — DC Current (A)
- AC A — AC Current (A)
- DC+AC — DC+AC measurement
- W — Power
- MAX/MIN AVG — MAX MIN AVG
- MAX/MIN — MAX MIN
- Ω — Resistance
- Continuity buzzer
- Diode
- Capacitance
- °C — Temperature
- Hz — Frequency
- PF — Power factor
- Harmonics
- Phase rotation
- dB — Decibel
- DUTY — Duty cycle ratio
- NCV — Non Contact Voltage
- Back light
- WP — Water proof
- PEAK HOLD — Peak hold
- DATA HOLD — Data hold
- AUTO POWER OFF — Auto power off
- AUTO POWER SAVE — Auto power save
- OUT PUT — Output
- Filter — Filter
- REL — Relative
- External Power Supply — External Power Supply
- USB — USB
- LP-Ω — Low power Ω
- Bluetooth — Bluetooth®

Safety Warnings

Please read the “Safety Warnings” in the instruction manual supplied with the instrument thoroughly and completely for safety use. Failure to follow the safety rules can cause fire, trouble, electrical shock, etc. Therefore, make sure to operate the instrument on a correct power supply and voltage rating marked on each instrument.

Special measurement application “KEW CONNECT”

Maintenance work till now...

- Takes time due to many measurement points
- Manual input is hard and error-prone
- Spend a lot of time writing reports
- Input work is troublesome

From now…

Auto data save → Easy! Data transfer → E-mail the data at the site → Quick! Report creation

Just copy and paste the mailed data to create reports.

- No miss-transcription
- Reducing labor cost
- Eliminating data input work

FREE App “KEW CONNECT” supporting iOS/ Android devices

MULTIMETERS

MODEL 1009

DC V · DC A · Ω · •)) · ⊣⊢ · ⊣⊢ · Hz · DUTY · DATA HOLD · REL · AUTO POWER OFF

- Display : 3999 counts.
- Auto range and manual range selector provided. (with range hold feature)
- Resistance range provides audible continuity test.
- Automatically turns power off in about 30 minutes to conserve battery life.
- Direct current measurement up to 10A AC and DC.

KEW 1011/1012

1012 TRUE RMS · DC V · DC A · Ω · •)) · ⊣⊢ · ⊣⊢ · Hz · DUTY · 1011 °C · 1011 DATA HOLD · MAX/MIN · REL · AUTO POWER OFF

- 6040 counts with Bar Graph display
- MIN/MAX function enables to record min & max value
- REL(relative value) function
- Temperature measurement, selectable for °C and °F (KEW 1011)
- True RMS can measure and indicate distorted waveforms (KEW 1012)
- DUTY function

DC A	50μA/2.5/25/250mA ±3% of FS
Ω	2/20kΩ/2/20MΩ ±3% of scale length
Decibel	-10 - +62dB
hFE	0 - 1000(Ω × 10) ±3% of scale length
Power source	R6(AA)(1.5V) × 2, 6F22(9V) × 1
Dimensions	150(L) × 100(W) × 47(D)mm
Weight	330g approx.
Accessories	7066A(Test leads), 8901(Fuse[0.5A/250V]) × 1 (included), 1 (spares) R6(AA) × 2, 6F22 × 1, Instruction manual
Optional	9168(Carrying case)

MODEL 1110

DC V · DC A · Ω · •)) · °C

- High sensitivity DC20kΩ/V.
- 1m drop-proof heavy duty design.
- Can measure line voltage up to AC 600V. (Voltage to ground MAX AC 300V) (Protected by 600V ceramic fuse against accidental overload)
- Continuity buzzer, battery check, LED check function.
- Skeleton type robust and clear case with carrying handle furnished as standard accessory.

	1110
DC V	0.3V(16.7kΩ/V) ±3% of FS 3/12/30/120/300/600V(20kΩ/V) ±3% of FS
AC V	12V(9kΩ/V) ±4% of FS 30/120/300/600V(9kΩ/V) ±3% of FS
DC A	60μA/30/300mA ±3% of FS
Ω	3/30/300kΩ ±3% of scale length
Continuity buzzer	Buzzer sounds below 100Ω
Battery Test	1.5V(0.7 - 2V) ±3% of FS (10Ω load)
Temperature	Note: The MODEL1110 includes a temperature measurement scale, but it is not available for new customers due to the discontinue of the Temperature Probe 7060.
LED	10mA approx. at 0Ω (at 3V of battery voltage)
Applicable Standards	IEC 61010-1 CAT Ⅲ 300V /CAT Ⅱ 600V, IEC 61326-1
Power source	R6(AA)(1.5V) × 2
Dimensions	140(L) × 94(W) × 39(D)mm
Weight	280g approx.
Accessories	7066A(Test leads), 8923(Fuse[500mA/600V]) × 1 (included), 1 (spares) R6(AA) × 2, 9103(Carrying case), Instruction manual

DIGITAL MULTIMETERS

KEW 1019R

- True-RMS Measurements.
- Large display.
- Sturdy measurement code.
- Simple range composition.
- Easy-to-use smart structure hard case.
- DCV, ACV, Ω capacitor Measurement.
- Complies with IEC 61010-1 CAT Ⅲ 300V, CAT Ⅱ 600V.

	1019R

Except for 1051 USB | AUTO POWER OFF

- True-RMS or MEAN value detection mode can be selected *only for 1052, 1062
- DC+AC TRMS Measurement *only for 1061, 1062
  AC and DC values are displayed simultaneously via dual display.
- Fast Peak Hold response time of 250μs *only for 1062
- Low-pass filter *except for 1061
- Low Power-Ω measurements *only for 1062
- User calibration function

Safety design for industrial use

- Complies with IEC 61010-1 CAT Ⅳ 600V, CAT Ⅲ 1000V
- Terminal shutter to prevent incorrect test leads' insertion in current terminals
- Very wide operating temperature range
  From -20 to +55°C for 1061/1062
  From -10 to +55°C for 1051/1052

High Accuracy, High Performance and Reliable Measurements

- Top accuracy
  0.02% basic DC accuracy for 1061/1062.
  0.09% basic DC accuracy for 1051/1052.
- Dual display
  1061/1062: 50,000 counts, Bar graph with 51 segments. White back light display.
  1051/1052: 6,000 counts, Bar graph with 31 segments. White back light display.
- True-RMS Measurements
- Wide AC Frequency bandwidth from 10Hz to 100kHz *only for 1062

Reliable support for data management
*except for 1051

- Large data internal memory
- Download data and Live Monitoring on a PC via the USB interface

Reliable support for data management

※ except for 1051

Large internal memory to store test data

- KEW1062: 10,000 data in Logging mode, 100 data manually saved.
- KEW1061: 1,000 data in Logging mode, 100 data manually saved.
- KEW1052: 1,600 data in Logging mode, 100 data manually saved.
- Logging interval can set from 1 sec. to 30 min.

Test data can be transferred to a PC or directly to a Printer*

- Real-time data can be transferred and shown on a PC.
- Real-time transferring permits the saving of a considerable amount of data on a PC.
- Stored data of internal memory can be monitored by PC.

Data management with the software DMM Application*

- Stored data of internal memory can be monitored by PC.
- List of measured data can be converted into Graph.
- Data can be transferred to Excel** and saved as CSV file.

*Optional accessories are required.
**Excel is a registered trademark of Microsoft in the USA.

DC AC V | DC AC A | Ω | •)) | Hz | DATA HOLD | AUTO POWER SAVE

- Capable of measuring AC and DC currents with OPEN CLAMP SENSOR. 60A(2000A)/100A(2001A)/120A(2012RA)
- Increase cable strength with new rubber protective.
- Test probe can be fixed to the holster.
- Can measure AC/DC current and voltage.
- Pocket size and heavy duty design.
- With test lead cap to protect from short circuit accident.
- The open jaws are thin, perfect to clamp wires even in tight spaces.

- Ø6mm clamp jaw easy to use in tight places
- Measurement from 0.01mA to 120.0mA
- Dual display with backlight shows both mA measurement and percent of 4-20 mA span
- Spotlight for illuminating measurement point
- Analog output terminal for recorder connection
- Memory function stores up to 192,000 records (2510 only).
- Transfer data to PC via Bluetooth (2510 only).

LEAKAGE CLAMP METERS

MODEL 2431

Ø24 | MAX 200A | Resolution 0.01mA | AC A | DATA HOLD | Filter | AUTO POWER OFF

- Frequency Selector Switch to eliminate the effect of harmonics.
- Auto power-off function
- Rotary switch for easy one finger power-on and range selection.
- Minimum resolution 0.01mA

	2431
AC A (50/60Hz)	20/200mA/200A ±3%rdg±5dgt(20/200mA/100A) ±5%rdg±5dgt(200A)
AC A (WIDE)	20/200mA/200A ±2%rdg±4dgt[50/60Hz](20/200mA/0 - 100A) ±5%rdg±6dgt[40 - 400Hz](20/200mA/0 - 100A) ±5%rdg±4dgt[50/60Hz](100.1 - 200A)
Conductor size	ϕ24mm max.
Frequency response	40 - 400Hz
Effect of external stray magnetic field ϕ15mm 100A	10mA AC max.
Applicable Standards	IEC 61010-1 CAT Ⅲ 300V IEC 61010-2-032
Power source	LR-44(1.5V) × 2 *Continuous measuring time : approx. 15 hours (Auto power off : approx. 10 minutes)
Dimensions	149(L) × 60(W) × 26(D)mm
Weight	120g approx.
Accessories	9090 (Carrying case) LR-44 × 2 Instruction manual

MODEL 2432

High Sensitive Model

Ø40 | MAX 100A | Resolution 0.001mA | AC A | DATA HOLD | 10ms PEAK HOLD | Filter | AUTO POWER OFF

- Frequency Selector Switch to eliminate the effect of harmonics.
- Three ranges: 4mA/40mA/100A.
- Minimum resolution 0.001mA

	2432
AC A (50/60Hz)	4/40mA/100A ±1%rdg±5dgt(4/40mA) ±1%rdg±5dgt(0 - 80A) ±5%rdg(80.1 - 100A)
AC A (WIDE)	4/40mA/100A ±1%rdg±5dgt[50/60Hz] ±2.5%rdg±10dgt[20Hz - 1kHz](4/40mA) ±1%rdg±5dgt[50/60Hz] ±2.5%rdg±10dgt[40Hz - 1kHz](0 - 80A) ±5%rdg[50/60Hz] ±10%rdg[40Hz - 1kHz](80.1 - 100A)
Maximum circuit voltage	600V AC/DC (between line/neutral) 300V AC/DC (against earth)
Conductor size	ϕ40mm max.
Frequency response	20Hz - 1kHz(40Hz - 1kHz:100A)
Effect of external stray magnetic field	2mA AC approx. in proximity to a 15mm-dia conductor carrying 100A AC
Applicable Standards	IEC 61010-1 CAT Ⅲ 300V Pollution degree 2 IEC 61010-2-032
Power source	R03(DC1.5V) × 2 *Continuous measuring time : approx. 40 hours (Auto power off : approx. 10 minutes)
Dimensions	185(L) × 81(W) × 32(D)mm
Weight	290g approx.
Accessories	9097(Carrying case) R03(1.5V) × 2 Instruction manual

MODEL 2433/2433R

2433R: TRUE RMS | Ø40 | MAX 400A | Resolution 0.01mA | AC A | DATA HOLD

10ms: PEAK HOLD | Filter | AUTO POWER OFF

- Frequency Selector Switch to eliminate the effect of harmonics.
- Three ranges: 40mA/400mA/400A.
- Minimum resolution 0.01mA

Weight	570g approx.	600g approx.
Accessories	9094(Carrying case) 6F22 × 1 Instruction manual	
Optional	7073(2WAY Output cord)	

MODEL 2434

Ø28 · MAX 100A · Resolution 0.1mA · AC A · DATA HOLD · Filter · AUTO POWER SAVE

- Least affected by external stray magnetic field.
- 20mA AC max. in proximity to a 15mm-dia conductor carrying 100A AC.
- Frequency Selector Switch to eliminate the effect of harmonics.
- Minimum resolution 0.1mA

	2434
AC A (50/60Hz)	400mA/4/100A ±2%rdg±4dgt
AC A (WIDE)	400mA/4/100A ±2%rdg±4dgt[50/60Hz] ±3%rdg±5dgt[40 - 400Hz]
Conductor size	ϕ28mm max.
Frequency response	40 - 400Hz
Effect of external stray magnetic field ϕ15mm 100A	20mA AC max.
Applicable Standards	IEC 61010-1 CAT Ⅲ 300V IEC 61010-2-032
Power source	R03(AAA) (1.5V) × 2 *Continuous measuring time : approx. 150 hours(Auto power save : approx. 10 minutes)
Dimensions	169(L) × 75(W) × 40(D)mm
Weight	220g approx.
Accessories	9097(Carrying case) R03 × 2 Instruction manual

MODEL 2300R

KEW FORK CURRENT TESTER

TRUE RMS · Ø10 · MAX 100A · DC AC A · NCV · DATA HOLD · AUTO POWER OFF

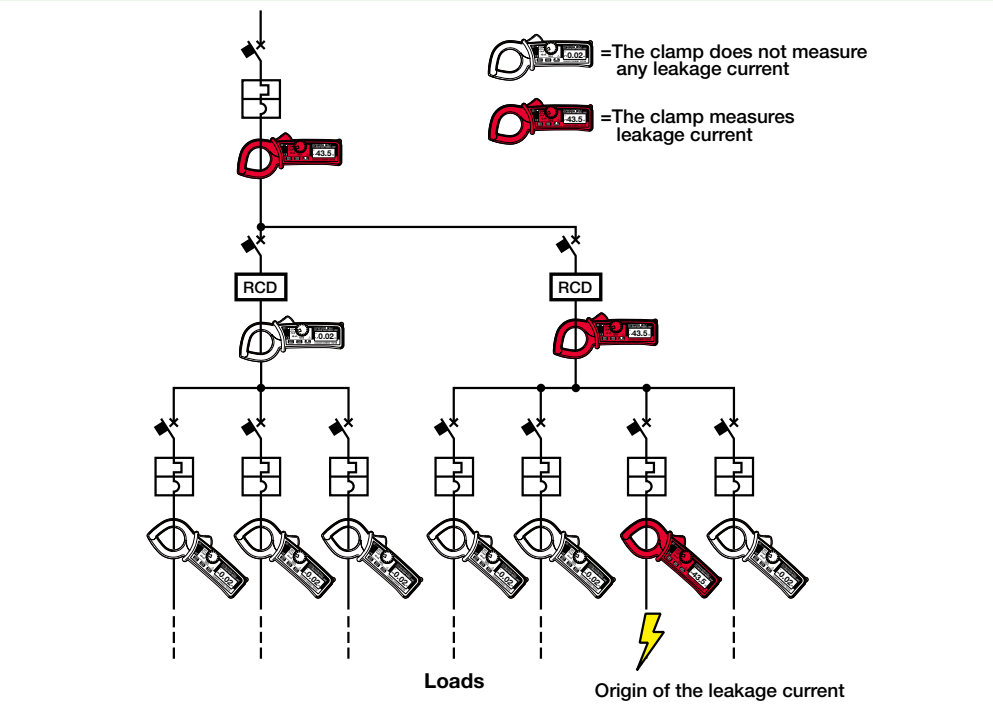
- True RMS reading is an essential feature for accurate measurement.
- "Non Contact" voltage function indicates the presence of AC voltage by warning the user with an audible signal.
- Set the DC current range to zero in one touch with the Zero Adjust function.
- Auto Power Off.
- Minimum resolution 0.1A

	2300R
Current measurement	AC A 0 - 100.0A ±2.0%rdg±5dgt [50/60Hz] DC A 0 - ±100.0A ±2.0%rdg±5dgt
Crest factor	2.5
Non contact voltage	Detect AC voltage without contacting with socket wire During voltage detection, “Hi” flashes and a buzzer sounds
Maximum digit	1,049
Conductor size	Max ϕ10mm
Applicable Standards	IEC 61010-1 CAT Ⅲ 300V Pollution degree 2
Power source	R03 (AAA) × 2 (Auto power off : approx. 10 minutes) *Continuous measuring time : AC A approx. 46 hours DC A approx. 52 hours
Dimensions	161.3(L) × 40.2(W) × 30.3(D)mm
Weight	110g (including batteries)
Accessories	9113(Carrying case) R03 (AAA) × 2 Instruction manual

KEW FORK 2300R can be used in crowded connection boxes, where cables are very short, and space is too limited to clamp cables using with a traditional clamp meter.

ADVANTAGES USING THE KYORITSU LEAKAGE CLAMP METERS:

- Work professionally: No need random check to identify the fault that causes RCD tripping. In fact our leakage clamp meters measure exactly the same leakage current to earth / ground detected by RCD. Once you measured it, you trace and find it. It is like to have an RCD "built-in" your clamp meter, nothing will trip on it but you will measure the leakage current on its display!
- Easy to use, you just need to clamp:
  -all active conductors (for leakage current measurements)
  -or just one phase (for the AC load current measurements, like the conventional clamp meters ranging up to 100A / 200A / 400A or 1000A, depends on the model).
- Before starting any action, clamping the active conductors at the origin of the electrical installation: you will immediately know if there is a leakage current to earth / ground.
- Then you will trace the leakage current clamping every secondary circuit one by one and without disconnecting the conductors in the junction boxes (see the below example).
- No wasting time because using these special clamp meters you will find out the fault without turning OFF the power line.
- When there are more than one fault, that only the sum of them causes the RCD tripping, such clamp meters are even more useful for a definitive solution.
- An essential tool to identify the causes of leakage current to earth / ground, you will appreciate it since the first use!



High frequency selector switch

All the leakage clamp meters of Kyoritsu have a frequency response selector switch that allows you to determine the level of earth / ground leakage current including or not the high frequency.
In other words, it can help to identify the "traditional" leakage current at 50/60 Hz (generated by low insulation condition of motors, of old lightings, of cables, etc) and the "high frequency" leakage current (generated by PC, inverters, UPS, harmonics, etc).
Therefore this feature is very helpful for a quick judgment: the leakage is due to poor insulation resistance or due to problems with devices that work with high frequency.

Discover here more details on the use of the Kyoritsu Leakage clamp meters: https://www.kew-ltd.co.jp/en/support/applicationnotes.html

CLAMP SENSOR/CLAMP ADAPTOR

KEW 8115

CLAMP SENSOR

Ø12 | AC MAX 130A | DC MAX 180A | DC AC A | AUTO POWER OFF

- Permits extension of the AC and DC current ranges of almost any Digital Multimeters (DMMs) without breaking the circuit under test.
- Using KEW 8115 with KEW 1051/1052 (DMM) the display can be set for direct reading in A.

	8115	
Measuring range	AC 0.1 - 130Arms	DC 0 - ±180A
Output voltage	AC 10mV/A	DC 10mV/A
Accuracy	±1.2%rdg±0.4mV (50/60Hz) ±2.5%rdg±0.4mV (40Hz - 1kHz)	±1.2%rdg±0.4mV (*)
Low battery warning	2.2V±0.2V or less - Red LED flash (1.9V±0.2V - Automatically power off)	
Conductor size	ϕ12mm max.	
Operating temperature & humidity range	-10 - 55°C, relative humidity 85% or less (no condensation)	
Output impedance	Approx. 10Ω or less	
Applicable Standards	IEC 61010-1 CAT Ⅲ 300V Pollution degree 2, IEC 61010-2-032, IEC 61326-1	
Power source	LR03(AAA)(1.5V) × 2 Continuous use: approx. 40 hours(Auto power off: approx. 20 minutes)	
Cord length	Approx. 1,200mm	
Output connector	ϕ4mm banana plug	
Dimensions	127(L) × 42(W) × 22(D) mm	
Weight	Approx. 140g	
Accessories	9095(Carrying case), LR03(AAA) × 2, Instruction manual	

*This accuracy is defined after the completion of the KEW 8115 zero-adjustment whilst connected to a DMM.

MODEL 8112

CLAMP ADAPTOR

Ø8 | MAX 120A | AC A

Model 8112 clamp adaptor is designed to be an AC current/voltage conversion probe capable of measuring AC current from 0.1mA to 120A in conjunction with digital multimeters.

		8112		
Range	Measuring ranges	Output voltage	Accuracy	Frequency response
200mA	AC 0 - 500mA	AC1V/A (1000mA→1V)	±1.5%rdg±0.2mA	50Hz - 1kHz
	AC 0 - 1000mA		±3%rdg±0.4mA	40Hz - 10kHz
2A	AC 0 - 20A	AC100mV/A (20A→2V)	±1%rdg±1mA	40Hz - 1kHz
			±1.5%rdg±2mA	1k - 10kHz
20A	AC 0 - 20A	AC10mV/A (120A→1.2V)	±1%rdg±0.01A	40Hz - 1kHz
	AC 20 - 60A		±2.5%rdg	50Hz - 10kHz
	AC 60 - 120A		±2.5%rdg	100Hz - 10kHz
Conductor size		ϕ8mm max.		
Frequency characteristics		30Hz - 100kHz(-3dB)		
Applicable Standard		IEC 61010-1 CAT Ⅱ 100V Pollution degree 2.		
Dimensions		153(L) × 18(W) × 23(D)mm		
Weight		100g approx.		
Accessories		9095(Carrying case) Instruction manual		

KEW 8161

CLAMP SENSOR

Ø24 | MAX 100A | AC A

- KEW 8161 clamp sensor is designed to be an AC current / voltage conversion probe capable of measuring AC current up to 100A in conjunction with digital multimeters.

	8161
Measuring range	AC0 - 100A
Output voltage	AC 1000mV/AC 100A(10mV/A)
Accuracy	±2.0%rdg±3.0mV (45 - 65Hz) ±2.5%rdg±3.0mV (65 - 1kHz)
Conductor size	ϕ24mm max.
Operating temperature & humidity range	-10 - 50°C, relative humidity: 85% or less(no condensation)
Output impedance	22Ω or less
Applicable Standards	IEC 61010-1 CAT Ⅲ 300V Pollution degree 2 IEC 61010-2-032, IEC 61326-1,2-2
Withstand voltage	AC3470Vrms (50/60Hz)for 5 sec.
Insulation resistance	50MΩ or greater at 1000V
Output connector	22Ω or less
Dimensions	97(L) × 59(W) × 26(D)mm
Cable length	Approx. 1.2m
Weight	270g approx.
Accessories	Instruction manual

CE AUTO DISCHARGE

photo : 3007A

- Bar graph to display insulation resistance.
- Displays the value of external AC voltage along with flashing symbol.
- Auto null function to automatically subtract the test lead resistance before displaying the real continuity resistance value.
- Trac-Lok mode to conserve battery life on insulation and continuity tests (Model 3007A only).
- Live circuit warning beeper.
- Releasing the test button automatically discharges the charges stored in the circuit under test.
- Backlight function to view the test results in dimly lit areas (Model 3007A only).
- 200mA continuity measuring current to IEC 61557.
- Minimum 1mA current on insulation tests to IEC 61557.

Power source	R6(AA)(1.5V) × 6
Dimensions	167(L) × 185(W) × 89(D)mm
Weight	860g approx.
Accessories	7122B(Test leads) 9074(Cord case) 8923(Fuse[0.5A/600V]) × 1 (included), 1 (spares) R6(AA) × 6, 9121(Shoulder strap), Instruction manual

MODEL 3132A

- Dust and drip proof construction. (designed to IEC 60529 IP54)
- Designed to meet IEC 61010-1 and IEC 61557 safety standard.
- 1mA rated test current at the minimum resistance.
- 200mA measuring current on continuity testing.
- Automatic discharge of circuit capacitance.
  (Any charge stored in the circuit under test will be automatically discharged after testing.)
- Live circuit warning buzzer and neon lamp.
- Small and lightweight. Shock resistant new case material.
- AC voltmeter with linear, easy-to-read scale.
- Operates on AA, R6 × 6 dry batteries.

INSULATION TESTERS

Why insulation test is necessary?

All live conductors of electrical appliances and installations must be insulated to prevent electric shock hazards from inadvertent contact, fire hazards from short circuit and equipment damage. In addition, a low insulation resistance in installation will result in a leakage current, and hence causes a waste of energy which would increase the running costs of the installation.
Insulation resistance must be checked by applying appliances or installations a higher voltage than its normal working voltage, because an insulation resistance is lower at higher voltage than at lower voltage. Kyoritsu's insulation resistance testers provide measurement at high levels of test voltages.
Periodical test is also important to ensure that insulation of installations or appliances is not deteriorating. Foreign matter and mechanical factors like wear or breakage may reduce insulation resistance. Regular tests and data logs can detect possible fault in insulation.

Standards and applications

The International Standard of Electrical Installation of Buildings IEC 60364 has a dedicated section named "Verification". This can be found in part 6. This section stipulates minimum values for the insulation resistance, measured with a particular test voltage, with no equipment connected to the circuits.

Nominal circuit voltage	Test voltage in d.c. applied by Insulation tester	Insulation resistance value
SELV, PELV (≦ 50V a.c. ≦ 120V d.c.)	250V	≧ 0.5MΩ
Up to and including 500 V (including FELV) with the exception of the above cases	500V	≧ 1MΩ
Above 500V	1000V	≧ 1MΩ

The testing apparatus (insulation testers) have to be capable of supplying an output current of at least 1mA at its nominal test voltage.

According to IEC 60364, a typical for 230/400V electrical installation (excluding SELV and PELV), requires that the insulation resistance at a test voltage of 500 V d.c. is larger than 1 MΩ.

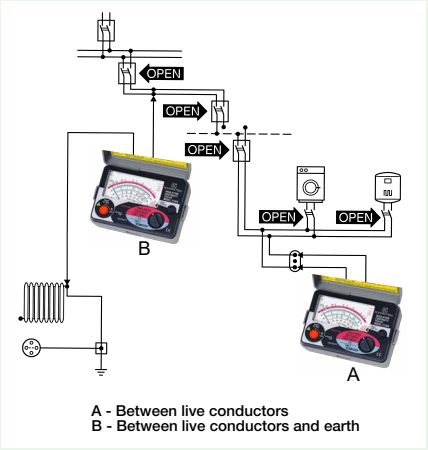
A test voltage of 1000V can be used for testing the insulation resistance of large electric motors, switchboards, industrial processing machines, devices and circuits with voltages exceeding 500V (but below 1000V a.c. and 1500V d.c.).

A test voltage lower than 250V (for example 15V, 50V, 100V and 125V) may be available in some insulation testers for testing the insulation resistance in telecommunication devices and circuits, security devices, local networks, speech (audio) devices, delicate electronic circuits and PCBs.

Insulation Testing Methods

■ Measurement of Insulation resistance between live conductors (A)
Prior to testing, make sure that the circuit or part of the installation to be tested is disconnected from the mains supply and not energized. It is also necessary to ensure: the point of the installation to be checked is not open due to other equipment incorporated, the load connected with a fixed load and socket outlet is disconnected from the mains supply, and relay coils, fluorescent lamps, etc do not produce continuity between conductors. Circuits or components likely to be damaged by insulation test voltage must be removed from the circuit under test. If they cannot be disconnected, an alternative testing method is to measure insulation resistance between live conductors and earth.

■ Measurement of insulation resistance between live conductors and earth (B)
The test must be carried out with equipment always disconnected, i.e., with the mains switch open it must be disconnected from the mains supply. Earth terminal must be connected to earth and Line terminal to a live conductor or conductors.Where there is insulation deterioration or an indoor electrical installation is not partly or totally insulated a variety of electric hazards may be anticipated.



A - Between live conductors
B - Between live conductors and earth

To give some of the examples;
- Leakage current dangerous to the human body will develop.This is particularly the case with equipment that has no good earth and therefore is not properly protected against the potential difference.
- Overheating of conductors due to the leakage of current or microscopic discharging will cause short circuits or fires.
- RCDs will trip, with resulting damage to the equipment which will also cause short circuits and fires.

Kyoritsu's dedicated leakage clamp meters MODEL 2431, 2432, 2433, 2433R, 2434, KEW 2413F and 2413R will be very helpful in identifying the possible causes of such accidents.

HIGH VOLTAGE INSULATION TESTERS

2500V 5000V

KEW 3121B/3122B

photo : 3121B

- Easy and simple operation.
- Automatic ranges, indicated by different LED's.
- Newly-designed alligator clip.
- It comes with a tough hard case.
- Safety standard IEC 61010-1 CAT Ⅳ 300V

1100mm alligator clip side

Use of Guard Terminal

Illustrated in this Fig. is an example of the insulation resistance measurement of an electric wire. If the line probe is simply connected to the wire conductor and the earth lead to the immersion liquid container as shown, a measurement error will be introduced as this results in the measurement of the combined resistance of insulation resistance and the surface leakage resistance at the cut end of the electric wire. In order to remove this surface leakage current, wind a guard wire around the cut end of the conductor and connect it to the guard terminal of the instrument using the guard lead. Then, the surface leakage current will bypass the indicating meter of the insulation resistance tester.

HIGH VOLTAGE INSULATION TESTERS

5000V

KEW 3127

CAT IV 600V | DC AC V | USB | AUTO POWER OFF | Bluetooth

- Insulation Resistance up to 10TΩ
- Short-Circuit Current up to 5mA
- Wide Test Voltage from 250V to 5000V
- Diagnostic Insulation Tests: IR, PI, DAR, DD, SV, RAMP.
- Wireless communication by Bluetooth for transferring and showing real-time data to PC and Android device.
- Memory and Logging functions.
- Filter function reduces noise interference.
- Robust design for field use with IP65 (lid closed).
- Powered by rechargeable battery.

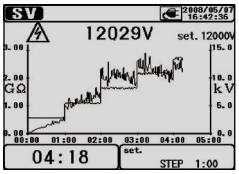
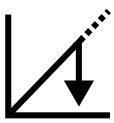
SV SV Measurement (Step Voltage)

During the test, the applied voltage incrementally steps by a certain voltage taking successive 5-time measurement. Degradation of insulation may be doubted when insulation resistances become lower at higher applied voltages.



RAMP RAMP TEST

Voltage used in Step voltage test is raised in steps but that used in Ramp measurement is gradually raised.
The KEW 3127 Ramp test generates a rising voltage ramp up to the selected voltage.



[Breakdown Mode]
KEW 3127 automatically stops the test if the insulation breaks down in order to prevent damage to the object being tested.

[Burn Mode]
KEW 3127 allows the insulation test voltage to continue even after the insulation breaks down. This enables you to locate a fault, such as pinholes in windings, by seeing a spark or a wisp of smoke.

Large Graphical Display

Graphic representation of the insulation resistance and leakage current versus time on large display with bar graph and backlight.

EARTH VOLTAGE

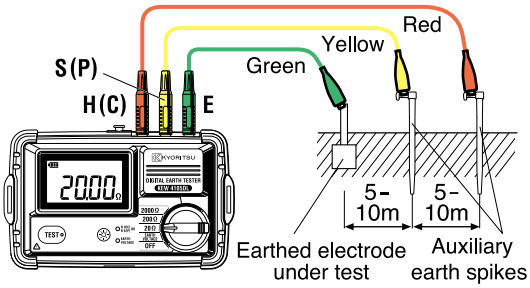
Measurement of the earth electrode resistance (3-Pole method)

[MODEL 4102A/KEW 4105A/KEW 4105DL]

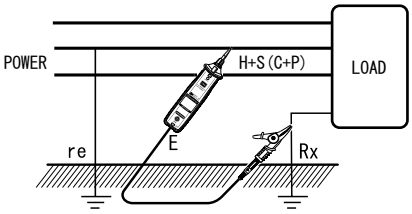
The international standard IEC 60364-6 provides information regarding the measurement of the resistance of an earth electrode for TT, TN and IT systems.
This measurement shall be made by the Volt-Amperometric method using two auxiliary earth electrodes.
The instrument that covers this requirement is the Earth Tester.



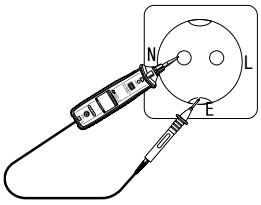
Precise Measurement

Measurement of the simplified earth resistance (2-Pole method)

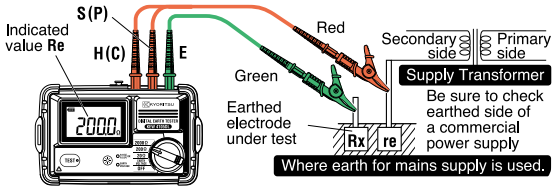
[KEW 4300/MODEL 4102A/KEW 4105A/KEW 4105DL]



Measuring the earth resistance of load



Measuring the earth resistance of wall socket

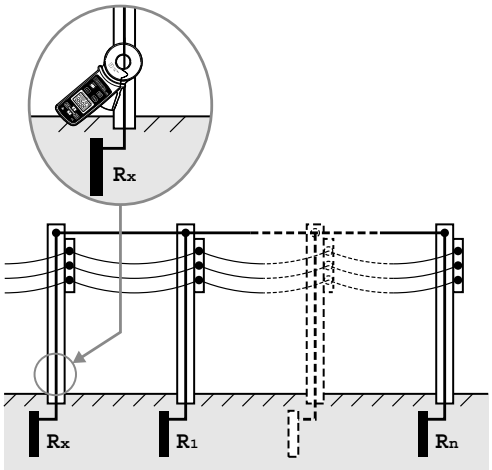


Simplified Measurement

Measurement of the earth resistance with Earth Clamp

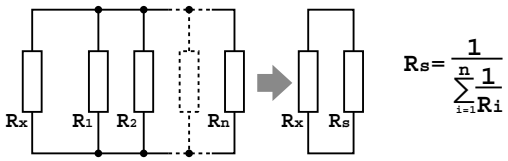
[MODEL 4200/KEW 4202]

(Why earth measurements can be found by only clamping it?)



Rx, is defined as earth resistance under test, and R1, R2…Rn are defined as earth resistance of other measuring objects.

These earth resistances, R1, R2,… Rn can be considered that they are connected in parallel. And They can be regarded as a combined resistance Rs. The Rs can be regarded small enough against Rx since a combined resistance consists of several resistances.
Following is an equivalent circuit diagram of this circuit.



Voltage V is applied to the object (Resistance Rx) measured from the voltage injection transformer CT1, and the current I corresponding to the earth resistance is flowed.
The current I is detected with detection transformer CT2, and object (Resistance Rx) measured can be put out by the calculation. (refer to the right diagram)

$$\frac{V}{I} = R = Rx + Rs$$

$$Rx \gg Rs = \frac{1}{\sum_{i=1}^{n} \frac{1}{Ri}}$$

$$\frac{V}{I} = Rx$$

KEW 4105A Soft case model
KEW 4105A-H Hard case model

- In addition to the facility for precision measurement, test leads for simplified two wire measuring system also supplied as standard accessories.
  (unit can be hung from the neck for simplified measurement)
- The latest circuit design permits the instrument to operate with the minimum of influence from earth voltage and earth resistance of auxiliary earth spikes.
- Dust and drip proof. (designed to IEC 60529 IP54)
- Earth resistance value can be read directly from the scale.
- Designed to meet IEC 61010-1 safety standard.
- Capable of measuring earth voltage.
- Small and lightweight. Shock resistant new case material.
- 2mA measuring current permits earth resistance tests without tripping earth leakage current breakers in the circuit under test.
- Lead wire connection to C and P terminals and proper auxiliary earth resistance can be checked by “OK” lamp. Lead wire connection to C and E terminals is good when “OK” lamp is illuminated. (4102A)

KEW 4106

- Earth resistance measurement with six ranges covering measurements from 0.001 Ω to 200 kΩ.
- Earth resistivity (ρ) measurement is automatically calculated after having set the distance between Auxiliary Earth Spikes (Wenner method).
- Automatic and Manual selection of the Test Current Frequency in four bands of 94/105/111/128Hz. In Automatic mode KEW 4106 will select the most suitable Frequency.
- Advanced Filtering method (based on FFT Fast Fourier Transform) reduces noise interference for obtaining stable measurements.
- Up to 800 measurement results can be saved in the memory and recalled on the display.
- The stored results can be transferred to a PC via USB adaptor (Model 8212-USB) by using software "KEW Report" which are included.
- Robust design with IP54 protection.

KEW4300 is simplified earth resistance tester (based on 2-pole method) that can be used for various distribution lines and electrical appliances and it also can measure AC/DC voltage. (As for AC voltages, true rms values can be obtained.)

- 200/2000Ω (2 ranges) : auto-ranging.
- Warning buzzer triggered at 100Ω or less.
- LED lights up when a large earth voltage is detected.
- Live circuit warning when 30V or higher voltage is detected.
  (KEW4300 detects voltage even when measuring resistances.)
- LED light for illuminating measurement points.
  (It turns on/off automatically in relation to the ambient brightness.)
- Small test current (max 2mA) not triggering RCD.

MODEL 4200/KEW 4202

photo : 4202

Note: A single earthing can not be measured. (Only for Multiple Earthing system)

- The earth resistance from 0.05 to 1500Ω can be measured without the auxiliary earth spikes in multi-earthing systems
- True RMS leakage or phase current readings from 0.1mA to 30.0A provides vital additional information in earthing networks
- Filter function offers increased immunity to electrical noise and a Noise mark appears in excessively high noisy environments
- Memory function up to 100 data
- Bluetooth® communication (4202 only)

	4200	4202
Earth resistance Auto range	20.00/200.0/1500Ω ±1.5%±0.05Ω(0.00 - 20.99Ω)* ±2%±0.5Ω(16.0 - 99.9Ω) ±3%±2Ω(100.0 - 209.9Ω) ±5%±5Ω(160 - 399Ω) ±10%±10Ω(400 - 599Ω) Values are displayed, but accuracy isn't guaranted(600 - 1580Ω)

Dimensions	167(L) × 185(W) × 89(D)mm
Weight	750g approx.
Accessories	Molded plug test leads* 7121B(Distribution board test leads) 9147(Cord case) 9121(Shoulder strap) Instruction manual

* 7123(AU): Australian plug 7124(UK): British plug(13A)
7125(EU): European SCHUKO plug 7126(SA): South african plug

- Custom microprocessor controlled for highest accuracy and reliability.
- 3 LEDs for checking correct wiring status.
- 15mA LOOP measurement:LOOP impedance 2000Ω range measurement is carried out with low test current (15mA). The current will not cause tripping out involved RCD even the one with the lowest nominal differential current (30mA).
- Direct reading of Prospective Short Circuit Current (PSC).
- Measure low loop resistances(resolution of 0.01Ω)
- Automatic lock-out if test resister overheats.
- Large custom digital display readout .
- Visual indication of reversed phase and neutral wiring at socket.
- Designed to IP54 Rating

Loop Testing Methods

In the buildings mainly used for private residence where low voltage power is supplied from electric utilities the fundamental protection against electric shock hazards is provided by appropriately coordinating the function of an earthing circuit with automatic switches placed at the latter stage of indoor wiring circuits. This is intended to quickly cut off the supply to an earthing circuit where a fault occurs following touch voltage exceeding an acceptable limit. Proper protection against electric shock hazards is given when the TT wiring system satisfies the requirement as expressed by the following formula:

$Ra \times Ia \leqq 50$

where Ra is the sum of the resistances of earth bars and protective conductors and Ia is the maximum current of a protection system provided for installations, indicating that the value obtained by multiplying Ra with Ia is not more than 50V. This means a maximum voltage one can touch shall not exceed 50V in the event of an earth fault.

■ Method of earth fault loop impedance testing at socket outlet. As shown in Fig., total earth fault loop impedance can be measured by plugging a loop tester into socket . The value of earth fault loop impedance measured represents the sum of transformer coil winding resistance, phase conductor (L3) resistance and protective conductor (PE) resistance as well as source earth resistance and installation earth resistance. With the loop tester set to any one of the PSC (prospective short circuit current) range, it is also possible to measure earth fault current.

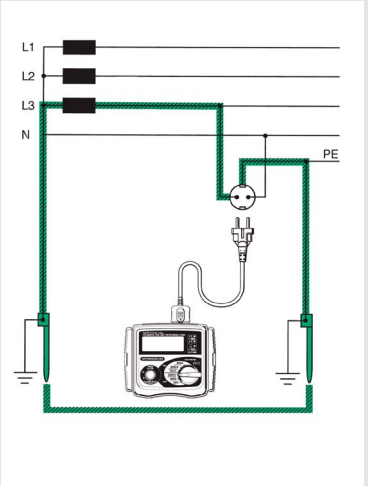

Fig. Earth fault loop impedance testing at socket outlet.

KEW 4140

- Anti-Trip Technology for complete trip free Loop testing on all RCDs rated 30mA and above.
- Dual Display allows simultaneous measurements like Loop & PFC/PSC.
- Two wire connection for Loop L-L, L-N and PSC testing is possible.
- Phase rotation, Voltage and Frequency measurements.
- Lock-down test button for 'hands free' testing with auto-start operation.
- Display and front panel keyboards with Backlight to be visible in dark places.
- Water and Dust proof (IP54)

KEW 5410

- **Measurement of RCD trip time**
  Conducting testing of rated residual non-operating currents at × 1/2 Range, measuring RCD trip time at × 1 and × 5 Ranges.
- **Measurement of trip out current**
  Measuring trip out current by varying current automatically.
- **Remote Test**
  Enabling a user to hold the Test Leads with his both hands by locking the Test Button. Measurement will automatically start when the main voltage is detected.
- **Voltage Measurement**
  Carrying out a constant measurement of voltage in the stand-by mode at each Range.
- **Auto-detection of Contact voltage**
  Detecting the voltage to earth of Earth electrodes or Protective conductors during RCD test - when applying test currents - at measurement using EARTH in order to prevent electrical shocks caused by the damaged earth. Measurement will be ceased at AC50V or more.
- **Dust and Water proof**
  Dust and Water proof construction. (designed to IEC 60529 IP54)
- **Backlight**
  Facilitating working at dimly illuminated locations.

Protective conductor resistance test		
Measuring range	0.00-20.00Ω	
Open circuit voltage	5V±0.4V DC	
Measuring current	200mA DC(nominal value)	
Accuracy	±3%rdg±5dgt	
Insulation resistance test		
Rated voltage	250V	500V
Measuring range	0.00-20.00MΩ	
No-load voltage	250V DC +20%,-0%	500V DC +20%,-0%
Short circuit current	1.5mA DC or less	
Accuracy	±2%rdg±3dgt	
Load current/Leakage current test		
Item	Load current	Leakage current
Mains voltage range	100-253V/50Hz	
Measuring range	0.10-10.00A rms	0.10-20.00mA rms
Accuracy	±10%rdg±5dgt	±3%rdg±5dgt
RCD test		
Rated voltage	230V -15% - +10%/50Hz	
Rated current	10mA/30mA	
Function	× 1	× 5
Test duration	0.0ms-500.0ms	0.0ms-40.0ms
Operating time accuracy	±2ms(≦40ms), ±8ms(>40ms)	
Power source	LR6(AA)(1.5V) × 6	
Applicable Standards	IEC 61010-1 CAT Ⅱ 300V, IEC 61010-2-030, IEC 61010-031, EN 61326-2-2, AS / NZS3760	
Dimensions	261(L) × 104(W) × 57(D)mm	
Weight	Approx. 930g(including batteries)	
Accessories	7277(Mains lead), 7129A(Test lead with Alligator clip), 7161A(Flat test prod), 7276(Adaptor for Extension cord), 9193(Carrying case), 8928(Fuse[10A/250V]), 9121(Shoulder strap), Buckle, LR6(AA) × 6, Instruction manual	
Optional	8263-USB (USB cable with "KEW Report(software)"), 7275(Printer cable:Mini Din 6pin - D-sub 9pin) 7248(Test lead with Alligator clip and Flat test probe)	

The KEW 6205 is a hand-held portable appliance tester and can test electrical safety of Class Ⅰ and Class Ⅱ appliances. The Tester performs test and indicates PASS/FAIL result complying with the criteria of judgment defined in the AS/NZS 3760:2010 for In-service safety inspection and testing of electrical equipment.

Test Function

Function	Tests of contents
Class Ⅰ Test	• Protective conductor resistance (Test current 200mA DC nominal) • Insulation resistance test (250V or 500V) • Leakage current test (100-253V/50Hz) • Load current test (100-253V/50Hz)
Class Ⅱ Test	• Insulation resistance test (250V or 500V) • Leakage current test (100-253V/50Hz) • Load current test (100-253V/50Hz)
Extension Lead Test	• Protective conductor resistance (Test current 200mA DC nominal) • Insulation resistance test (between Line/Neutral-Earth short, Line/Neutral) • Leakage current test (100-253V/50Hz) • Polarity test
RCD Test	• RCD test (10mA/30mA)

CE AUTO DISCHARGE ATT KEW CONNECT Only 6516BT

Insulation	• 4 ranges available for insulation resistance test(100/250/500/1000V) Automatic discharge of circuit capacitance. • Polarization Index(PI) and Dielectric Absorption Ratio (DAR).
Loop	• High test current range of 2Ω with 0.001Ω resolution. • Zs Limit compares the values required by Electrical Installations Standard with measured results.
RCD	• Type AC, A, F, B(General & Selective), EV (Electric Vehicle) and Variable RCDs. • Single and Auto test, Ramp test and Contact voltage.
Earth	• Earth resistance test 2 and 3 wires with all accessories included.
ACV	• TRMS Voltage measurements 2-600V, Mains Frequency.
Continuity	• Continuity test at 200mA or 15mA with selectable buzzer for fast judgment.
Phase rotation	• On 3-phase lines with clear indication of the sequence on the display.
SPD (Varistor)	• Surge Protective Device test, for SPD that uses varistor.
PAT	• Portable Appliance Tester function, for Insulation and Continuity.
Display	• Color LCD 3.5 inches dot matrix.
ATT	• Anti-Trip Technology (with 2 & 3 wire) for no trip LOOP L-PE testing on all RCDs. • With 2 wire only, very useful in case of no Neutral (e.g. 3-phase motor lines).
HELP	• Display shows how to connect the instrument according to the function selected.
Memory	• Save and display up to 1000 data.
Bluetooth	• Communication by "KEW Connect" (6516BT only).
Safety	• IEC 61010-1 CAT IV 300V, CAT III 600V. IEC 61557-1,2,3,4,5,6,7,10.

Specifications

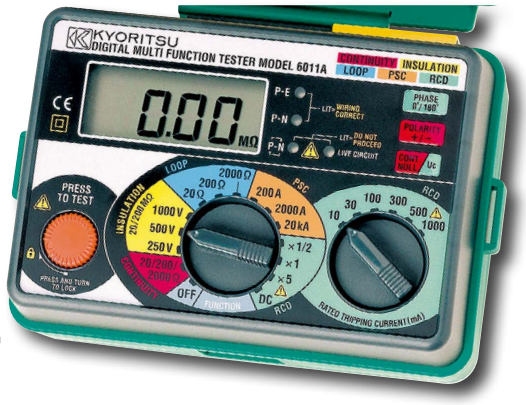
	MODEL 8212-USB
Communication method	USB Ver1.1
Driver type	Virtual COM port
Communication speed	19200bps max.
Dimensions	Adaptor : 53(L) × 36(W) × 19(D)mm Cable : 2m approx.
Operating temperature and humidity	-10 - +50°C 85%RH or less with no condensation
Storage temperature and humidity	-20 - +60°C 85%RH or less with no condensation

System requirements
OS: Windows® 11/10/8.1/8
Display: XGA (Resolution 1024 × 768 dots) or more
Hard-disk: Space required 20Mbyte or more
Others: With CD-ROM drive and USB port

* Windows® is a registered trademark of Microsoft in the United States.

MULTI FUNCTION TESTERS

MODEL 6011A



The Model 6011A can perform FIVE separate test functions: insulation, continuity, earth loop impedance, prospective short circuit current and RCD trip testing in full compliance with IEC 61557.

PV INSULATION EARTH TESTER

KEW 6024PV

- Accurate measuring of Insulation resistance even if the PhotoVoltaic (PV) arrays are generating power.
- No need to short circuit the PV arrays or test at night to measure the Insulation resistance.
- Earth resistance measurements with VoltAmperometric method at 3 and 2 pole.
- Waterproof design: Can measure in bad weather conditions.
- Memory function up to 1000 data.
- Luminescence buttons and large Backlight display.
- Elapsed time, after starting a measurement, is displayed with the measured values.
- Compact and light weight.
- Test probe with a remote control switch is supplied as standard accessory.
- Auto-discharge with voltage display and the measured value.
- Data transfer and analysis to a PC is possible by using its relative software included in the set.

PV Insulation
500/1000V

Insulation
250/500/1000V

Earth
20/200/2000Ω

Volts
AC 600V/DC 1000V

■ Indication of test duration facilitates insulation integrity check with one-minute readings.

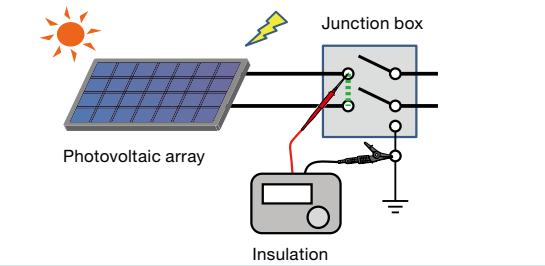
*6024PV supports the PV systems up to 1000V.

PV INSULATION EARTH TESTER

Accurate measurements not influenced by the generating PV voltage

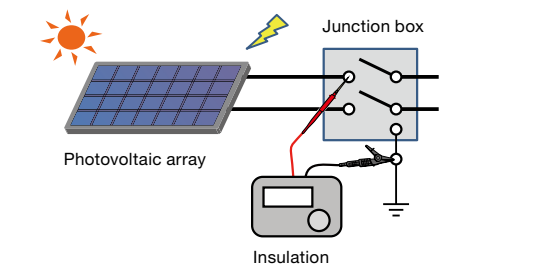
With conventional insulation testers:

[measurement needs to short - circuit the PV arrays]



A breaker is required and risk of arc hazard exists.

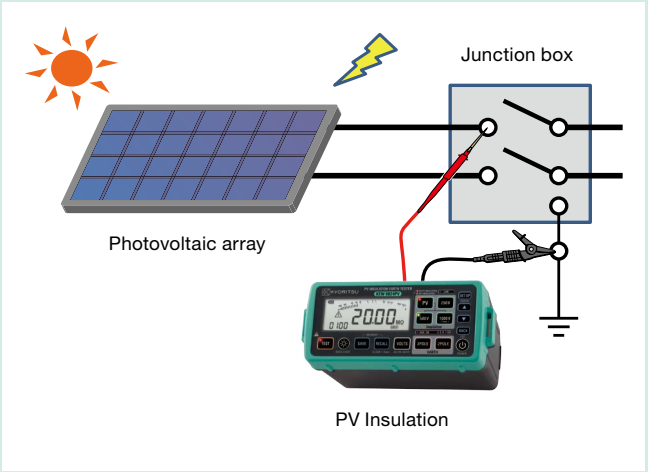
[measurement without short - circuit the PV arrays]



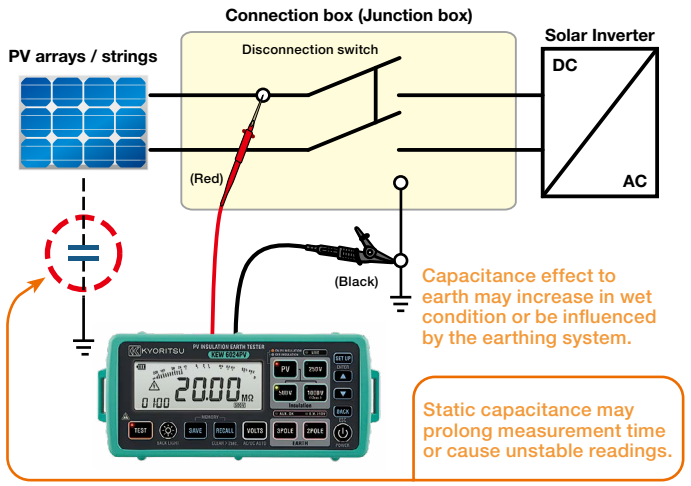
Low-risk, but not accurate.

KEW 6024PV makes safe & accurate insulation resistance measurement possible!

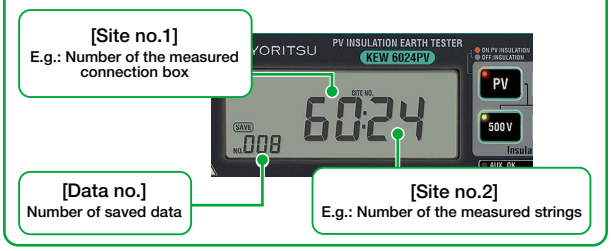
- Increase your efficiency at work: no need waiting for the dark or compromising the accuracy of measurement.
- Safe: no need to short circuit the PV arrays.



Accurate and quick results also in case of large capacitance effects.



Analyzing and processing the recorded data with a PC.



Can measure under the bad weather condition.

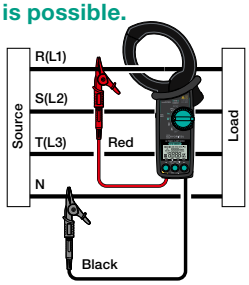
Power measurement on any wiring system is possible.

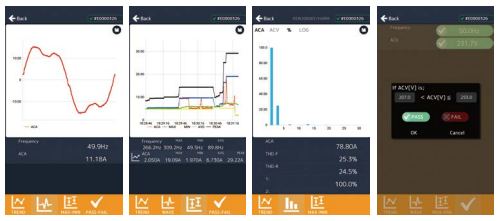
KEW 2060BT, KEW 2062 and KEW 2062BT can perform 1P2W measurement and balance and unbalance measurements of 3P3W / 3P4W.
The double display can simultaneously show many parameters like W & PF, W & deg, W & VA, W & Var, V & A, etc.

* E.g.: 3P4W(Balance)



Use the application KEW Power* to improve work efficiency (Except for 2062)

Display image



Download and install our special application "KEW Power*" in your smartphone or tablet device for logging the measured values. Remote monitoring of voltage, current, power, trend graph of harmonics, and wave form is possible with "KEW Power*"; this is helpful for simple Power Quality check. Measured values can be saved in your smartphone or tablet device in csv format: the data is editable in excel format.

Video

TRUE RMS | USB | Bluetooth | External Power Supply

- Comprehensive real-time monitoring, recording and analysis of single and 3-phase systems
- Voltage, Current, Power Factor and Frequency measurements
- Power analysis (Active, Apparent and Reactive power)
- Energy analysis (Active, Apparent and Reactive energy)
- Active power accuracy: ±0.3%rdg±0.2%f.s.
- Automatic wiring check function to prevent incorrect connections
- Large memory capability (2 GB) using built-in SD card Interface
- Recording interval can be set between 1second and 1hour.
- Real time & remote measurements using Android application
- Windows software for data analysis and setting via USB port or Bluetooth®
- Synchronous measurements between two units of KEW6305
- Wide selection of clamp sensors allow measurements from 0.1A to 3000A
- The instrument automatically recognizes what kind of clamp sensor is connected to it
- Double power supply system via AC line and batteries

As easy as 1 ➔ 2 ➔ 3 !

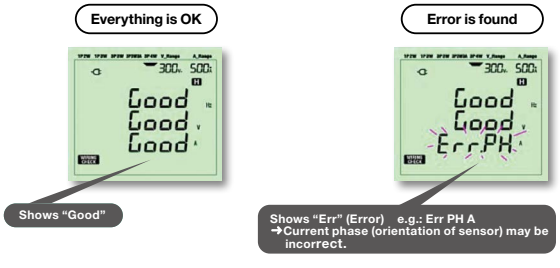
Starting from OFF position and rotating the Rotary switch clockwise, KEW6305 is ready to use in 3 simple steps

1. SET UP

Rotate the Rotary switch to SET UP. All the instrument settings can be easily selected by using instrument buttons. All the settings can also be selected by connecting KEW6305 to a PC via USB or Bluetooth®.

2. WIRING CHECK

Rotate the Rotary switch to WIRING CHECK. The Automatic Wiring check function will prevent incorrect connections, check the connections and display the results on the LCD. Error messages appear on display to indicate wrong orientation of Clamp sensors or in-correct connections.



3. W/Wh/DEMAND Measurements

Rotate the Rotary switch to W/Wh/DEMAND. The instrument can perform Instantaneous, Integration and DEMAND measurements.
START / STOP button to start / stop recording

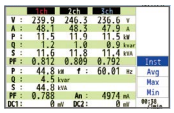
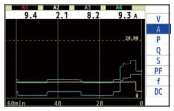
Simultaneous Power & Power quality measurements

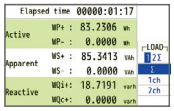
W/Wh Power & Energy



Instantaneous value

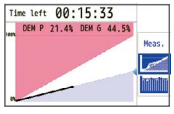
- Measures instantaneous / average / min / max for voltage, current, active / reactive / apparent power, PF (cosfi) and line frequency all on one screen.
- Trend of all main parameters and customized Zoom functions.





Integration value

- The display will list the active / reactive / apparent energy in total and for each phase consumed (or generated in case of co-generation like solar panels, etc).

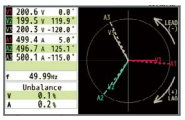


Demand

- To support demand control, present energy usage and estimated value are displayed on a graph while recording max demand value and the occurred time.

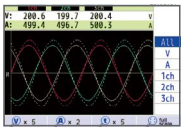
Vector

- Can display voltage and current by vector per Ch.



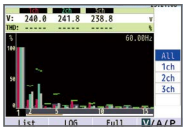
Waveform

- Displays voltage and current on each Ch by waveform.



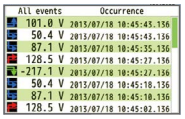
Harmonics Analysis

- Graphic display of harmonic components up to 50th order for voltage, current and power.



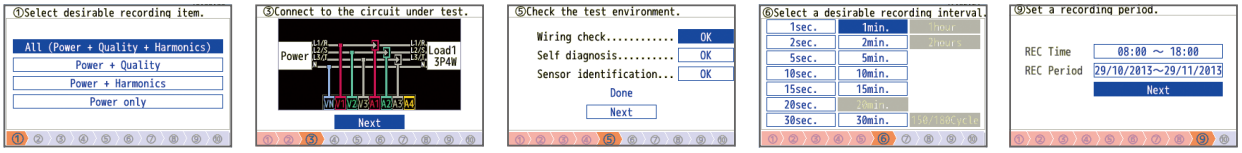
QUALITY Event

- Measures voltage swells / dips / interruptions / transients and inrush currents that may indicate a weak power distribution system. Such phenomena may damage or reset devices. All necessary data is displayed by pressing one key.



Quick Start Guide

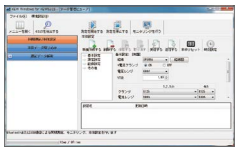
One-Touch START/STOP Key for Quick Start Guide providing easy setup guides.

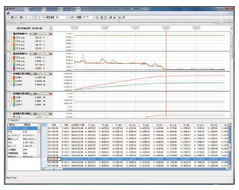


Guide start → Connect to the circuit → Wring check → Select interval → Set recording time → Start recording

Windows software for data analysis and setting via USB port

- Automatic creation of graph and list from recorded data.
- Uniform management of setting and recorded data acquired from multiple devices.
- Data can be expressed in crude oil and CO_2 equivalent values in the report.
- EN 50160 report can be generated after survey.





〈System requirements〉
- OS: Windows® 11/10/8.1
- Display: XGA(Resolution 1024 × 768 dots) or more
- Hard-disk: Space required 1Gbyte or more
- Other: With CD-ROM drive and USB port, NET Framework (3.5 or more)

※Windows® is registered trademark of Microsoft in the United States.

Real time and Remote measurements

- Measurements can be graphically displayed on Android devices or PC in real-time via Bluetooth® communication.

MODEL 8312 MODEL 9132

Can you close your distribution board door during surveys?

The KEW6315 facilitates safe testing by being extremely compact and with two clever option extras: a magnetic case(9132) for attaching it to the sides of metal enclosures and a power supply adaptor(8312) which takes the power for the instrument from the supply being measured.

SD card Interface

SD cards up to 2GB can be used

Possible recording time
When the 2GB of SD is used:

Interval	REC item	
	Power	+Harmonics
1sec	13days	3days
1min	1-year or more	3months
30min	10-year or more	7-year or more

Data of power quality events are not considered to estimate the possible recording time. The max possible time will be shortened by recording such events.

KEW 5010 (for Current)
KEW 5020 (for Current/Voltage)

TRUE RMS | USB | External Power Supply

3 channel inputs for the simultaneous recording of Leakage Current, Load Current and Voltage

Power Quality analysis. (only on KEW 5020)
(Power Quality: Reference voltage, Swell, Dip, Short power Interruptions)

Large capacity for storing 60,000 data points
60,000 data points can be recorded when 1ch is used, and when all the three channels are used, 20,000 data points per channel can be recorded.

Lowpass Filter will filter out the harmonics.
(Cutoff Frequency = Approx. 160Hz)

LED flickers when the preset current / voltage value is exceeded.
(Available for Trigger / Capture Recording, Power Quality Analysis modes)

CALL : Confirmation of recorded data
- The following can be displayed: number of recorded data points, (max+ min+ peak) value for each channel complete with time/date information in the Normal recording mode. (Detected values (i.e. when values are outside preset limits) can be displayed in other recording modes)
- RECALL: The last 10 recorded data points including time/date can be recalled on the logger display.

Selection of One-time mode or Endless mode
One-time on : →|
Recording will stop when memory is used up.

One-time off : ⟲
Overwrite the old data, and store the latest data.

Non Volatile Memory
Recorded data will be retained even if the batteries are exhausted or replaced due to the presence of a nonvolatile memory (guaranteed for 10 years)

Battery power indicator
Indicates battery voltage in 4-levels.
(It is possible to use the logger for a further approx 24 hours even after the warning symbol is flashing.)

The user friendly PC software " KEW LOG Soft "is supplied.
- Supplied with the user friendly software " KEW LOG Soft 2".
- This permits editing, analysis and graphical display of data.
- The recorded data is downloadable onto a PC via USB cable.
- Variation of the measured voltage and current data can be confirmed simultaneously on the PC display monitor. (only on KEW 5020)
- Simplified Power Integration
  (The "KEW LOG Soft 2" uses current and voltage recorded to calculate the integral power consumption)
- Continuous measuring time : Approx. 10 days (Alkaline Battery)

		5010	5020
Recording mode		Normal, Trigger, Capture	Normal, Trigger, Capture, Power quality analysis
Operating system		Successive approximation(CH1 single synchronized sampling)	
Rated max. working voltage		AC9.9Vrms, 14V peak value	
Number of input channel		3ch	
Measuring method		True RMS	
RMS measuring interval		approx. 100ms.	
Sampling interval	: Normal / Trigger mode	approx. 1.65ms/CH	
	: Capture mode	approx. 0.55ms (waveform: at every 1.1ms)	
	: P.Q.A mode	—	approx. 0.55ms
Low battery warning		Battery mark display (in 4 levels)	
Over-range indication		"OL" mark is displayed when exceeding the measuring range	
Auto power off		Power-off function operates automatically after a switch remains for 3min. (when recording is stopped)	
Location for use		Indoor use, Altitude up to 2000m	
Operating temperature & humidity range		-10 - 50°C / Relative humidity 85% or less (no condensation)	
Battery		LR6(AA)(1.5V) × 4 / External supply DC9V(Special AC Adaptor)	
Possible measurement time		Approx.10days (with alkaline LR6 batteries)	
Applicable Standards		IEC 61010-1 CAT Ⅲ 300V Pollution degree2 IEC 61326 (EMC)	
Dimensions		111(L) × 60(W) × 42(D)mm	
Weight		Approx. 265g	
Accessories		LR6(AA) × 4 9118(Carrying case[Soft]) KEW LOG Soft 2(PC software) 7148(USB cable) Instruction manual Quick manual Install manual USB Notice sheet	
Optional		8146,8147,8148(Leakage & Load current clamp sensor) 8121,8122,8123,8124,8125,8126,8127,8128(Load current clamp sensor) 8130,8135(Flexible clamp sensor) 8309(Voltage sensor : only KEW5020) 8320(AC adaptor) 9135(Carrying case) 7185(Extension cable)	

Normal Recording Mode
(AC 50/60Hz, Sine wave, Input: 10% or more of the range at CH1)

Range	RMS Accuracy
100.0mA	±2.0%rdg±0.9%f.s. + Accuracy of sensor
Other ranges	±1.5%rdg±0.7%f.s. + Accuracy of sensor
Crest factor	2.5 or less :RMS accuracy(sine)+ 2%rdg+1%f.s.

*Max, Min and Instant Peak values in Normal Recording mode are just reference values; their accuracies aren't guaranteed.

Trigger Recording Mode
(AC 50/60Hz sine wave)

Range	Accuracy
100.0mA	±3.5%rdg±2.2%f.s. + Accuracy of sensor
Other ranges	±3.0%rdg±2.0%f.s. + Accuracy of sensor

Capture/ Power Quality Analysis Recording Mode

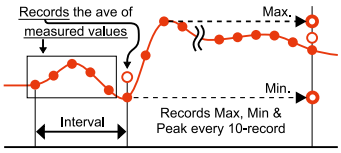
Range	Accuracy
100.0mA	±3.0%rdg±1.7%f.s. + Accuracy of sensor
Other ranges	±2.5%rdg±1.5%f.s. + Accuracy of sensor

4 recording modes make various measurements possible

NORM Normal recording mode

For monitoring power line status or an intermittent leakage.

- Records the variation of the current / voltage in a given interval (For monitoring the variation of the current / voltage against time.)

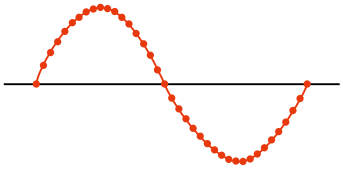


- A choice of 15 recording intervals are available: 1 sec. to 60 min. (1,2,5,10,15,20,30 sec, 1,2,5,10,15,20,30,60 min.)
- The average of the measured value in every recording interval is recorded. The Max., Min. and Peak values (sampled crest value converted to sine RMS value) are recorded every 10 readings.

CAP Capture recording mode

For observing waveforms easily.

- Waveform display via a PC by sampling the inputs every 0.55ms.

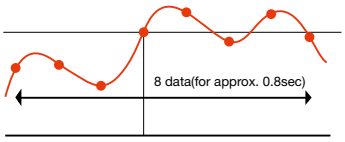


- When the preset current / voltage value is exceeded, instantaneous values are recorded for 200ms (from 10(50Hz) to 12 (60Hz) waveforms) before and after preset value is exceeded.
- LED flickers when the measured values exceed the preset current / voltage value.

TRIG Trigger recording mode

For observing an irregular operation of an ELCB/RCD, an irregular current / voltage.

- Detects the value, time and frequency of the current / voltage when the preset value is exceeded.

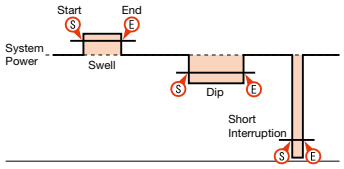


- When the detection level (i.e. preset value) is exceeded, 8 data points (True RMS values for approx. 0.8 sec) and peak value are recorded before and after the preset value is exceeded.
- Inrush current or an abnormal current / voltage can be detected by sampling the inputs at every 1.6ms.
- LED flickers when the measured values exceed the preset current / voltage value.

PQA Power Quality Analysis Mode

For monitoring and observing voltage fluctuations.

- Detects the reference voltage, Swell, Dip and Short Interruption. Records the values detected with the start time and end time.



- Samples the inputs every 0.55ms and detects the voltage fluctuation every 10ms.
- LED flickers when the voltage fluctuation is detected.

Analyzing and processing the recorded data with a PC

The user friendly PC software “KEW LOG Soft 2” is supplied.

- The type of the sensor connected to the logger will be automatically recognized.
- Just click appropriate dialog boxes for set up if it is not required to input any comments.
- By using commercially available USB hub, multiple loggers can be connected to a PC and can set the synchronized time.

System requirements

OS:	Windows® 11/10/8.1/8
Display:	XGA(Resolution 1024 × 768 dots) or more
Hard-disk:	Space required 100Mbyte or more
Others:	With CD-ROM drive and USB port

* Windows® is a registered trademark of Microsoft in the United States.

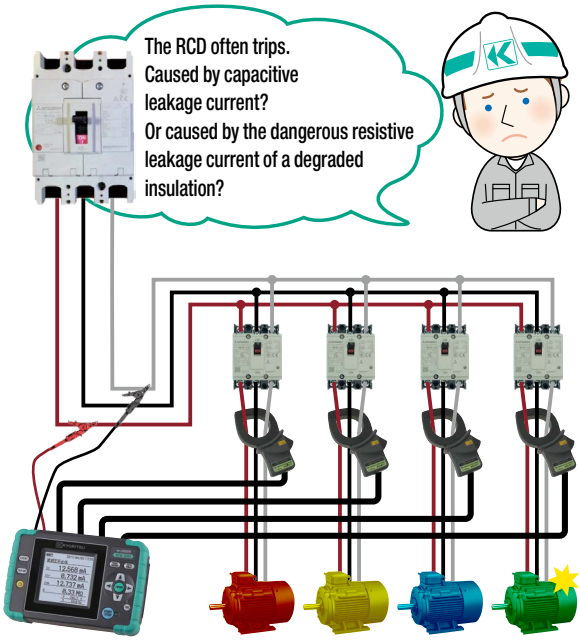
KEW 5050

Kew 5050 is an innovative Leakage Current Logger that can identify the resistive component of leakage current (Ior) in an electrical installation. Despite the capacitive component, the Ior is the dangerous component of the leakage current because Ior consumes power and then it can cause a rise in temperature that can lead to a fire and electric shock.

- Provides simultaneous measurements and logs up to 4 channels
- Supports various wiring systems
  (Single-phase 2&3-wire, Three-phase 3&4-wire*) *Except Ior for 3 Phase 4 wire
- World's fastest 200ms interval for leakage current measurement
- Offers both traditional leakage / load current measurements
- Large graphic display and magnet on the back case to attach it on metal enclosures

Can measure up to 4 channels simultaneously!

Best to diagnose unwanted RCD tripping



Gapless continuous measurement

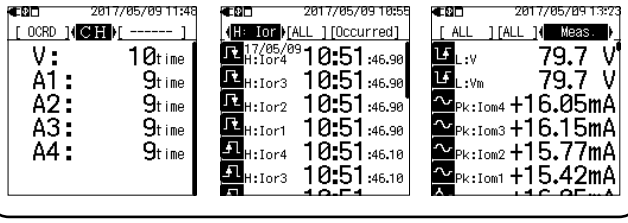
Performs fast sampling (24.4 µsec) continuously with gapless during logging to prevent intermittent leakages being overlooked as an event or max value.

	5050
Wiring configuration	1P2W, 1P3W, 3P3W, 3P4W
Measurements and parameters	Ior : Leakage current (Trms) with resistive components only Io : Leakage current (Trms) with basic wave of 40 - 70Hz Iom : Leakage current (Trms) including harmonic components V : Reference voltage (Trms) with basic wave of 40 - 70Hz Vm : Reference voltage (Trms) including harmonic components R : Insulation resistance, Frequency(Hz), Phase angle(θ)
Other functions	Digital output, Print screen, Back light, Data hold
Recording Interval	200/400ms/1/5/15/30s/1/5/15/30m/1/2hours
Ior	
Range	10.000/100.00/1000.0mA/10.000A/AUTO
Accuracy	For reference voltages of sine wave 40 - 70Hz and 90V Trms or higher, ±0.2%rdg±0.2%f.s. + clamp sensor amplitude accuracy + error of phase accuracy* (phase error) * add ±2.0%rdg to measured Io value when using Ior leakage clamp sensor. (θ: within the accuracy of reference voltage/ current phase difference ±1.0°)
Allowable input	1% - 110% (Trms) of each range, and 200% (peak) of the range
Display range	0.15% - 130% (display "0" for less than 0.15%, "OL" if the range is exceeded)
Io *Range, Allowable input and Display Range are the same as Ior .	
Accuracy	±0.2%rdg±0.2%f.s.+ clamp sensor amplitude accuracy
Iom *Range, Allowable input and Display Range are the same as Ior .	
Accuracy	±0.2%rdg±0.2%f.s.+ clamp sensor amplitude accuracy
Measurement method	Sampling speed 40.96ksps (every 24.4µs), gapless, calculate Trms values every 200ms.
Voltage	
Range	1000.0V
Accuracy	±0.2%rdg±0.2%f.s. * for waveforms of sine wave 40 - 70Hz
Allowable input	10 - 1000V Trms, and 2000V peak
Display range	0.9V - 1100.0V Trms (display "0" for less than 0.9V, "OL" if the range is exceeded)
Phase angle(θ)	
Display range	0.0° - ±180.0° (regarding the phase of reference voltage as 0.0°)
Accuracy	Within ±0.5° for the inputs of 10% or higher of leakage current range, sine wave 40 - 70Hz, reference voltage of 90V Trms or higher. Within ±1.0° when using Ior leakage clamp sensor, and Within ±0.5°+ clamp sensor accuracy when using general purpose clamp sensor.
Frequency meter range	40 - 70Hz
External supply	AC100 - 240V(50/60Hz) 7VA max
Power source	LR6(AA)(1.5V) × 6 (Battery life approx. 11h)
Display / update period	160 × 160dots, FSTN monochrome display / 500ms
PC card interface	SD card (2GB) *standard accessory
PC communication-interface	USB Ver2.0
Temperature and humidity range	23±5°C, less than 85%RH(without condensation)
Operating temperature and humidity range	-10 - 50°C less than 85%RH(without condensation)
Storage temperature and humidity range	-20 - 60°C less than 85%RH(without condensation)
Applicable Standards	IEC 61010-1 CAT Ⅳ, 300V CAT Ⅲ 600V Pollution degree 2 IEC 61010-2-030, IEC 61010-031, IEC 61326
Dimension/Weight	165(L) × 115(W) × 57(D)mm/approx. 680g (including batteries)
Accessories	7273(Voltage test lead) 8262(AC adapter) 7278(Earth cable) 7219(USB cable) 8326-02(SD card 2GB) 9125(Carrying case) Instruction manual, Cable marker, Software installation manual LR6(AA) × 6 KEW Windows for KEW 5050(Software)
Optional	8177(Ior Leakage clamp sensor 10A type ϕ40mm) 8178(Ior Leakage clamp sensor 10A type ϕ68mm) 8329(Power supply adapter)
Optional sensors (It cannot be used for Ior measurement)	8146, 8147, 8148 (Leakage & Load clamp sensor) 8130, 8133 (Flexible sensor) 8121, 8122, 8123 (Load clamp sensor) 8124, 8125, 8126, 8127, 8128 (Load clamp sensor)

Shows insulation resistance (R) values determined by the following formula.
V: Reference voltage/ Ior: Leakage current
Displayed value is just for reference since the measurement method differs from insulation resistance testers and may not be consistent with each other.
In case of 3P3W and 3P4W, for a correct Ior reading, the capacitance effect of each phase must be equal.

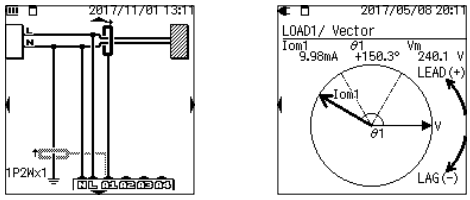
Quickly displays occurred events

Detailed information on the occurred events are displayed on the LCD. Different threshold values can be set for each channel and each event.

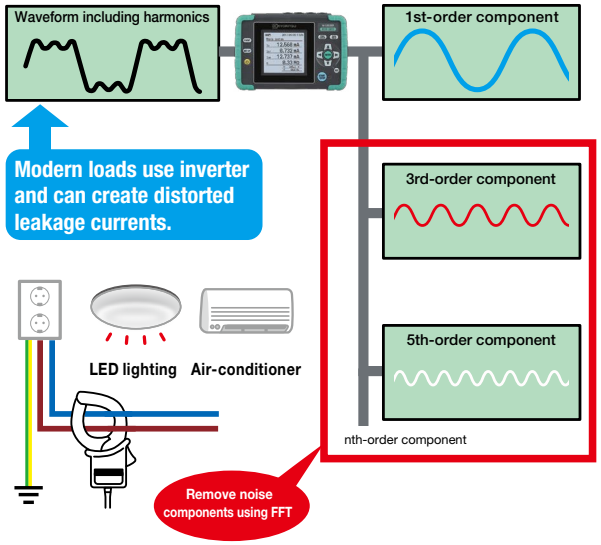


Various display modes

User-friendly graphical display of connections and phase differences



New Measurement method with FFT

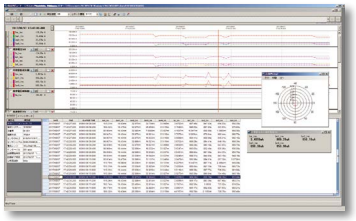


Unlike to traditional measuring apparatus, less susceptible to harmonics noises.

Successfully achieving logging with no effects of harmonics by True RMS calculation every 200 ms using FFT (Fast Fourier Transform).

Windows software

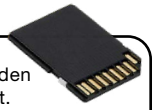
One-click graph and list generation. Visualizes timeline based graphs for easy analysis.
Data can be checked without using this software by changing the file extension to csv or others.



【System requirements】
OS: Windows® 11/10/8.1/8
Display: XGA (1024 × 768) or higher
HDD: 1Gbyte or more
Other: CD-ROM drive, USB port, .NET Framework 3.5, 4.6

* Windows® is a registered trademark of Microsoft in the United States.

SD card interface



Achieves long period of data logging. In case of sudden power interruption, data stored in the SD card aren't lost.

Possible recording time (with 2GB SD card)			
Interval	REC item		
	1P3W × 1	1P3W × 4	3P4W × 4
200 ms	25 days	8 days	7 days
1 sec	38 days	11 days	9 days
2 sec	76 days	22 days	18 days
5 sec	6.5 months	1.8 months	1.5 months
15 sec	1-year or more	5 months	4 months
30 sec		11 months	9 months
1 min or more		1-year or more

Applicable models	5050(Cannot be used for Ior measurement.), 6305, 6315

MODEL 8128

MAX 50A Ø24

	8128
Conductor size	ϕ24mm
Rated current	AC 5A (Max.50A)
Output voltage	AC 50mV/5A [Max. 500mV/50A](AC 10mV/A)
Accuracy	±0.5%rdg±0.1mV (50/60Hz) ±1.0%rdg±0.2mV (40Hz - 1kHz)
Phase shift	within ±2.0° (45 - 65Hz)
Cable length : Output connector	Approx. 3m : MINI DIN 6pin
Operating temperature ranges	-0 - 50˚C, less than 85% RH (without condensation)
Output impedance	Approx. 20Ω
Applicable Standards	IEC 61010-1, IEC 61010-2-032 CAT Ⅲ 300V Pollution degree 2 IEC 61326
Dimensions	100(L) × 60(W) × 26(D)mm
Weight	Approx. 160g
Accessories	9095 (Carrying case), Instruction manual, Cable marker
Optional	7146 (Banana ϕ4 adjuster plug), 7185 (Extension cable)
Applicable models	5010, 5020, 5050(Cannot be used for Ior measurement.), 6305, 6315

MODEL 8127

MAX 100A Ø24

	8127
Conductor size	ϕ24mm
Rated current	AC 100A
Output voltage	AC 500mV/100A (AC 5mV/A)
Phase shift	within ±2.0° (45 - 65Hz)
Cable length : Output connector	Approx. 3m : MINI DIN 6pin
Operating temperature ranges	-0 - 50˚C, less than 85% RH (without condensation)
Output impedance	Approx. 10Ω
Applicable Standards	IEC 61010-1, IEC 61010-2-032 CAT Ⅲ 300V Pollution degree 2 IEC 61326
Dimensions	100(L) × 60(W) × 26(D)mm
Weight	Approx. 160g
Accessories	9095 (Carrying case), Instruction manual, Cable marker
Optional	7146 (Banana ϕ4 adjuster plug), 7185 (Extension cable)
Applicable models	5010, 5020, 5050(Cannot be used for Ior measurement.), 6305, 6315

MODEL 8126

MAX 200A Ø40

	8126
Conductor size	ϕ40mm
Rated current	AC 200A
Output voltage	AC 500mV/200A (AC 2.5mV/A)
Phase shift	within ±1.0° (45 - 65Hz)
Cable length : Output connector	Approx. 3m : MINI DIN 6pin
Operating temperature ranges	-0 - 50˚C, less than 85% RH (without condensation)
Output impedance	Approx. 5Ω
Applicable Standards	IEC 61010-1, IEC 61010-2-032 CAT Ⅲ 600V Pollution degree 2 IEC 61326
Dimensions	128(L) × 81(W) × 36(D)mm
Weight	Approx. 260g
Accessories	9095 (Carrying case), Instruction manual, Cable marker
Optional	7146 (Banana ϕ4 adjuster plug), 7185 (Extension cable)
Applicable models	5010, 5020, 5050(Cannot be used for Ior measurement.), 6305, 6315

MODEL 8125

MAX 500A Ø40

	8125
Conductor size	ϕ40mm
Rated current	AC 500A
Output voltage	AC 500mV/500A (AC 1mV/A)
Phase shift	within ±1.0° (45 - 65Hz)
Cable length : Output connector	Approx. 3m : MINI DIN 6pin
Operating temperature ranges	-0 - 50˚C, less than 85% RH (without condensation)
Output impedance	Approx. 2Ω
Applicable Standards	IEC 61010-1, IEC 61010-2-032 CAT Ⅲ 600V Pollution degree 2 IEC 61326
Dimensions	128(L) × 81(W) × 36(D)mm
Weight	Approx. 260g
Accessories	9095 (Carrying case), Instruction manual, Cable marker
Optional	7146 (Banana ϕ4 adjuster plug), 7185 (Extension cable)
Applicable models	5010, 5020, 5050(Cannot be used for Ior measurement.), 6305, 6315

MODEL 8124

MAX 1000A Ø68

	8124
Conductor size	ϕ68mm
Rated current	AC 1000A
Output voltage	AC 500mV/1000A (AC 0.5mV/A)
Accuracy	±0.5%rdg±0.2mV (50/60Hz) ±1.5%rdg±0.4mV (40Hz - 1kHz)
Phase shift	within ±1.0° (45 - 65Hz)
Cable length : Output connector	Approx. 3m : MINI DIN 6pin
Operating temperature ranges	-0 - 50˚C, less than 85% RH (without condensation)
Output impedance	Approx. 1Ω
Applicable Standards	IEC 61010-1, IEC 61010-2-032 CAT Ⅲ 300V Pollution degree 2 IEC 61326
Dimensions	186(L) × 129(W) × 53(D)mm
Weight	Approx. 510g
Accessories	9094 (Carrying case) Instruction manual, cable marker
Optional	7146 (Banana ϕ4 adjuster plug), 7185 (Extension cable)
Applicable models	5010, 5020, 5050(Cannot be used for Ior measurement.), 6305, 6315

INTELLIGENT SOCKET TESTERS

INTELLIGENT SOCKET TESTERS

KEW 4506 NEW

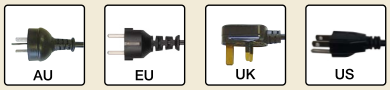
- Easy measurement by simply plugging into a socket outlet and pressing the test button.
- In only 1 second you will check voltage, correct wiring and polarity of Line, Neutral and Earth of a socket outlet.
- KEW 4506 can be used on TT earth system and combined with KEW 8343, also on TN-S. (See Where to Use).
- Low test current measurement method for avoiding tripping of RCDs.

4506			
Socket test*1			
Measurable range of power supply voltage		80V rms to 290V rms (50/60Hz) *The tester gives voltage warning if 253V or higher voltage is detected but it can perform socket test.	
Socket type		3 Pole	2 Pole
Judgement	PASS	PASS	PASS
	FAIL	L-N Reverse	L-N Reverse
		L-E Reverse	Abnormal voltage
		N-E Reverse	-
		E Not connected	-
		N Not connected	-
		N-E unjudgeable	-
		Abnormal voltage	-
AC V (L-N)			
Range		80 to 290V rms (50/60Hz)	
Accuracy		±2%rdg±4dgt	
Loop resistance (N-E)			
Range (Auto-ranging)		200Ω: 0.0 to 199.9Ω 2000Ω: 200 to 1999Ω	
Test current		200Ω: 5mA (5.3 Hz) 2000Ω: 1mA (5.3 Hz)	
Accuracy		±3%rdg±5dgt	
Applicable Standards		IEC 61010-1, 61010-2-030 CAT Ⅱ 300V, Pollution degree 2, IEC 60529(IP40)	
Operating Temp.& humidity range		-10 - 50°C, RH 85% or less	
Storage Temp. & humidity range		-20 - 60°C, RH 85% or less	
Power source		LR6 (AA)(1.5V) × 2	
Dimensions		212(L) × 56(W) × 39(D) mm	
Weight		Approx. 250g (including batteries)	
Accessories		KAMP 10 or 7284(Test lead with IEC connector) 9161 (Carrying case) LR6 (AA) × 2, Instruction manual	
Optional		8343(Signal Source for Intelligent Socket Tester)	

*1 If N-E resistance measurement function is turned off*2, test is performed with a test voltage applied from an optional signal source only: current flows between N-E is less than 1μA.
*2 If the function is disabled, KEW 4506 doesn't show resistance between N-E.

KAMP10 or MODEL 7284
Test lead with IEC connector
KAMP10:1,500mm 7284:720mm

Applicable to the socket outlet types of each country



KAMP 10(AU) : Australian plug
KAMP 10(EU) : European SCHUKO plug
KAMP 10(UK) : British plug (13A)
7284 : American(NEMA)plug

Carrying case

KEW 8343 NEW

8343		
Conductor size		ϕ24mm max.
Test voltage	Freq.	Approx. 1.8kHz
	TRMS	Approx. 20mV rms
Allowable input range		300V AC (50/60Hz) continuous 30A AC (50/60Hz) continuous
Operating Temp.& humidity range		-10 - 50°C, RH 85% or less
Storage Temp. & humidity range		-20 - 60°C, RH 85% or less
Power source		LR6 (AA)(1.5V) × 6
Applicable Standards		IEC 61010-1, 61010-031, 61010-2-032 CAT Ⅲ 300V, Pollution degree 2, IEC 60529(IP40)
Dimensions		Unit: 112(L) × 61(W) × 42(D) mm Test voltage injection clamp: 100(L) × 60(W) × 26(D) mm Cable length: Approx. 1.5m
Weight		Approx. 520g (including batteries)
Accessories		7157B (Alligator clips) 9096 (Carrying case) LR6 (AA) × 6, Instruction manual

MODEL 7157B
Alligator clips

MODEL 9096
Carrying case

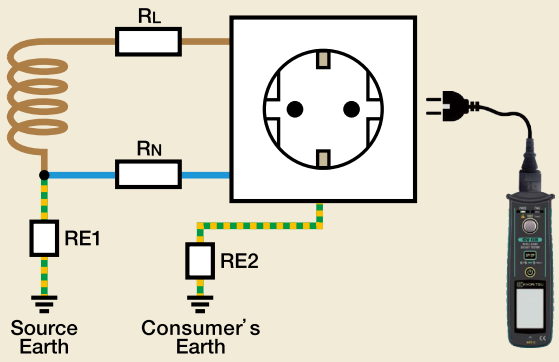
Where to use

KEW 4506 can test the wiring connection including the N-E Reverse of single-phase socket outlets. This tester can test single phase socket outlets wired to Three-phase 4-Wire, Single-phase 3-Wire, Single-phase 2-Wire supply systems.

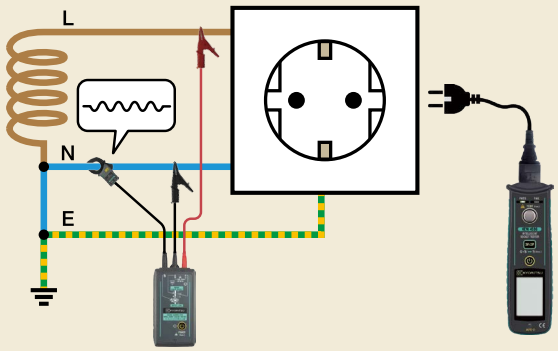
*KEW 4506 cannot be used for checking three-phase socket outlets and testing the RCD.

For use in a general TN system circuit, N-E Reverse can be determined only at socket outlets connected downstream of the N conductor where KEW 8343 is clamped.

For TT system



For TN system



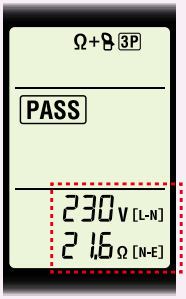
All test results and PASS/FAIL in a clear display screen

Easy measurement by simply plugging into a socket outlet and pressing the test button.

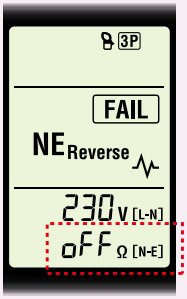
LCD backlight automatically turns on at the dark place.

*It is possible to disable backlight

Wiring check with the live circuit condition

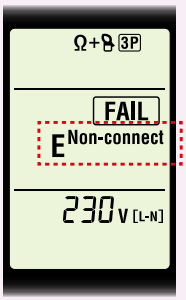


L-N voltage and N-E resistance at TT system can be displayed.

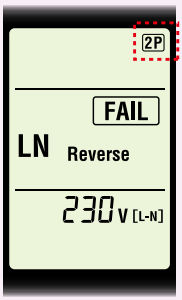


KEW 4506 has a mode which can detect the wiring connection avoiding any RCD tripping.

*resistance measurement OFF



Non-connect can be also displayed.



Wiring check for 2P(no earth) outlet is also available by selecting the 2P setting.

*2P conversion adapter which is required to connect with 2P outlet, isn't supplied.

KEW 5711

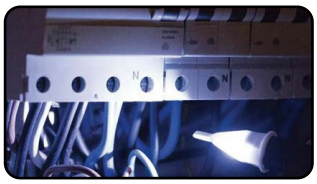
Voltage Detector

CAT Ⅳ 600V

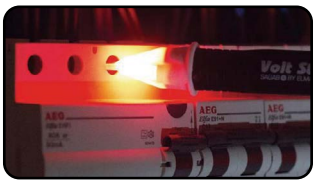
- Senses AC voltage through insulation
- Buzzer sounds and tip glows upon ac voltage detection
- Powerful flashlight
- Dual range (Hi/ Lo) sensitivity
- Ready to use without power-on
- Designed to meet IEC 61010-1

	5711
Operating voltage	AC 90 - 1000 V(Lo sensitivity) AC 20 - 1000 V(Hi sensitivity)
Frequency range	50/60Hz
Operating temperature	-10 - 50°C
Storage temperature	-20 - 60°C
Applicable Standards	IEC 61010-1 CAT Ⅳ 600V / CAT Ⅲ 1000V Pollution degree 2
Power source	LR03 / R03(AAA)(1.5V) × 2
Dimensions	153(L) × ϕ20mm
Weight	Approx. 40g (including batteries)
Accessories	LR03(AAA) × 2, Instruction manual

LED light



Bright Red Indicator



KEW 8035

Non-Contact Safety Phase Indicator

CAT Ⅳ 600V

- New technology permits safe testing, without the need of direct contact between probes and live wires.
- The insulated crocodile clips can clip insulated cables from ϕ2.4 to 30mm.
- Phase rotation is indicated by the rotary illumination of LEDs and logical audible tones.
- The instrument can be fixed to a metal panel via the magnet on the back side.
- Wide measuring range for 3 phase installations from 70V to 1000V AC.
- Super brightness function permits clear LEDs indication also in sunshine.

	8035
Functions	Phase rotation (Clockwise or Counter Clockwise), Presence of open phase
Detection method	Electrostatic induction
Measuring voltage range	From 70 - 1000V AC phase to phase (sine wave, continuous input)
Clamp diameter range	From ϕ2.4 to 30mm insulated cables
Measuring frequency range	45 to 66Hz
Phase rotation	Clockwise: Green arrow LEDs “rotate” in clockwise, Green symbol “CW” lits, Intermittent buzzer Counter Clockwise: Red arrow LEDs “rotate” in counter clockwise, Red symbol “CCW” lits, continuous buzzer
Visual indication	Via LEDs with Super brightness function
Battery voltage warning	Power LED blinks if battery voltage is too low.
Operating temperature & humidity range	-10 - 50°C, relative humidity 80% or less (no condensation)
Storage temperature & humidity range	-20 - 60°C, relative humidity 80% or less (no condensation)
Applicable Standards	IEC 61010-1 CAT Ⅳ 600V, CAT Ⅲ 1000V Pollution degree2
Power source	LR6(AA)(1.5V) × 4 * Continuous use: Approx. 100 hours (Auto power off in about 10 min.)
Dimensions	112(L) × 61(W) × 36(D) mm
Weight	380g approx.
Test leads	Double insulated cables, length approx. 70cm
Colours code	L1(U): Red L2(V): White L3(W): Blue
Accessories	9096 (Carrying case), LR6(AA) × 4, Instruction manual

KEW 8031 NEW /8031F

- Phase indicator designed to check the presence of open phase and also the phase sequence by rotating disk and lamps.
- Can check a wide range of 3-phase power source from 110V to 600V. Sealed against dust, the unit ensures trouble-free performance.
- Small, Lightweight and portable. Designed for maximum ease of operation and ruggedness.
- No exposed metal parts, Safety features are incorporated including the instant push button switch operation.(8031F Only)

KEW 5515

Infrared Thermometer

- Single laser allows more accurate measurements.
- Back light display helps to read in a dark place.
- Dual display: Main display shows the measured values and Sub display shows either of max, min, average or thermocouple value.
- Alarm function: The upper and lower temperature limits can be set.
- The red blinking back light indicates that the measured value is below or over the pre-set limits.

	5515
Measuring range	-32 - 535°C
Accuracy	±3.0°C(-32 - -20 °C), ±2.0°C(-20 - +100°C), ±2%rdg(100 - 535°C)
Infrared spectral band	5 - 14μm
Measuring diameter	1000mm/ϕ78mm (Distance/ Measuring dia.: 12:1)
Repeatability	Within ±1°C
Emissivity	Variable between 0.10 and 1.00 (by 0.01 steps), Before shipment: 0.95
Collimation	Laser beam (630 - 670nm 1mW or less) specifies the center.
Thermocouple	K-type*
Measuring range of thermocouple	-199 - 1372°C
Accuracy of thermocouple	±1.5%rdg+1°C(-40 - 1372°C)
Response	500ms
Resolution	0.1°C
Auto power off	If no key is pressed for 6 seconds, the power is shut off automatically.
LCD display	LCD with back light (blinks in red when alarm function is activated)
Dual display	Simultaneous display (Measured value and either of max, min, average or thermocouple value.)
Operating temperature & humidity	0 - 50°C/ 10 - 90% RH
Applicable Standards	IEC 61326, IEC 61000-4-2, IEC 61000-4-3, IEC 61000-4-8
Power source	6F22(9V) × 1
Dimension	180(L) × 130(W) × 40(D)mm
Weight	Approx. 195g (excluding battery)
Accessories	9152(Carrying case), 6F22(9V) × 1 Instruction manual

*Commercial K-type thermocouple can be used with the product.

KT 200

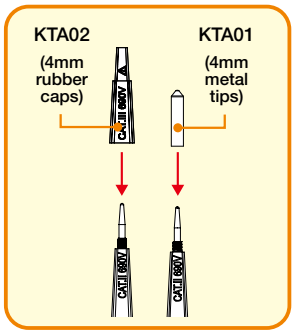
Accessories	LR03(AAA) × 2, KTA01(4mm metal tips[2pcs/set]), KTA02(4mm rubber caps[2pcs/set]), Instruction manual

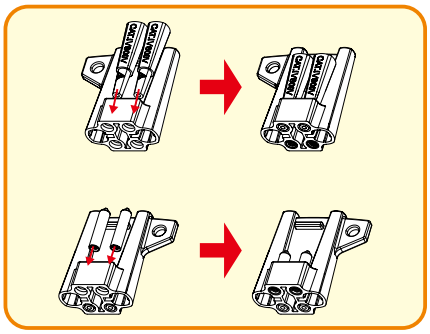
KT170AU is available for Australia and New Zealand market.

- Comply with the latest standards IEC 61243 and IEC 61010
- Novel design
  Large and bright LEDs: Values are visible in the dark place.
  Ergonomic design fits in the hand.
- Two functions are available in one model.
  "Measurement without battery" and "Self Test (all LED on)"
- Test leads withstand harsh environments at low temperature.
- Penlight(white LED)
- Auto-power ON / OFF
- Audible indication
- Variable test tips, ϕ2mm or ϕ4mm
- Probe protection cover can store the attachment of caps.
- IP65 (IEC 60529)

Variable top tips



Store the attachment of caps



Voltage Test (Double-pole Test)

- The voltage is indicated by LEDs.
  Buzzer sounds and Live circuit LED lights up when a threshold voltage of 50V is exceeded.
- Voltage polarity is indicated in following manner.

AC +12− +DC +12− -DC +12−

Bright LEDs and Penlight

Single-pole Phase Test

GLOSSARY

Accuracy

The accuracy of a digital tester is defined as the difference between the reading and the true value for a quantity measured in reference conditions. Accuracy is specified in the format: (±xx% rdg ±xx dgt)

The first portion identifies a percentage error relative to the reading, which means it is proportional to the input. The second portion is an error, in digits, that is constant regardless of the input.
"Rdg"is for reading and "dgt"is for digits. Dgt indicates the counts on the last significant digit of the digital display and is typically used to represent an error factor of a digital tester.

Auto-discharge Function

A function used immediately after an insulation test to automatically release charges stored within the circuit under test during measurement.
Voltage remaining in the circuit under test can be monitored during auto-discharging process by the showing display.

Auto-ranging

A function of a tester to automatically select the appropriate measuring range based on the input signal.

Average Value

The average of an AC waveform's instantaneous values taken over a half cycle. Ordinary testers respond to the average value.

For sinusoidal wave :
Average value = Maximum value × 2/π = Maximum value × 0.637

When the true RMS value is 100V ;
Average value= Maximum value × 2/π =141 × 0.637 = 90(V)
The reading of ordinary testers is calibrated in terms of the effective value of a sinusoidal wave even though they are responding to the average value. They are called average-responding-RMS-calibrated type of testers. As opposed to these, true-RMS type testers respond and show the true RMS value.

Crest Factor

The ratio of the maximum value to the effective value.
It represents the range of input in which a tester maintains linear operation, expressed by a multiple of the full scale value of the range being used.
Crest factor = Maximum value/True RMS value
For sinusoidal wave;
Crest factor = 141/100 = 1.41

Data Hold

A function to freeze the reading on a digital display for ease of checking or recording even in a difficult-to-read situation for a tester.

Decibel: dB

A unit used to express the magnitude of change in level of electric signal or sound intensity.
A voltage ratio of 1 to 10 is equal to -20dB, 10 to 1 to 20dB, 100 to 1 to 40dB and 1000 to 1 to 60dB. A power ratio of 10 to 1 is not 20dB, but 10dB, since power(P) is proportional to the square of voltage(V).

Diode Test

A function to apply a diode or a transistor a constant current having a value needed to turn it on in order to check the diode's or the transistor's forward voltage drop and identifying the connection direction of the device.

Distortion Factor

A degree of distortion of a waveform, typically expressed as the ratio of the effective value of harmonic components to the effective value of the fundamental component.

Dual Integration Method

A technique to convert voltage into time. The first integration time (Ts) and the second integration time (Tx) are used. First, the input voltage (Vx) is integrated on a certain time interval (Ts) and then, the resulting voltage is "reverse-integrated" using a reference voltage (Vr) until it becomes 0 (zero).

The "reverse-integration time" (Tx) is proportional to input voltage (Vx). Therefore, the input voltage (Vx) can be determined by measuring Tx.

With this technique, stable measurements can be taken with high accuracy, resolution and noise rejection ratio. One particular advantage is high noise rejection ratio at 50 or 60Hz power line frequency.

Effective Measuring Range of Insulation Tester

The measuring range for which the accuracy of an insulation tester is guaranteed. There are two kinds of effective measuring ranges: the first and second effective measuring ranges.

First effective measuring range
From 1/1000 to 1/2 the maximum effective scale value
(When there is no major scale division for 1/2 the maximum effective scale value, the nearest major scale division is used.)
(except for 3431, 3021A series)

Second effective measuring range
Scales divisions not included in the first effective measuring range
For example for a 500V/100MΩ insulation tester;
First effective measuring range: 0.1-50MΩ(±5% of indicated value)
Second effective measuring range: other than above, 0 and ∞ (±10% of indicated value)

Form Factor

The ratio of the effective value to the average value.
Form factor = Effective value/Average value

Frequency Response

The manner in which a device changes its output quantity it, its indication for a measured quantity or its response over a range of frequencies.
AC signals to measure with a tester can be of one frequency or from a wide frequency band ranging from low to high frequencies. To measure these frequencies, it is better to use a tester having a wide frequency response range.

Hall Element

When a current-carrying conductor is placed in a magnetic field so that the direction of the magnetic field is perpendicular

to the direction of the current flow, voltage is developed in the direction perpendicular to both the magnetic field and the current flow. This is called the Hall effect and the Hall element is a device that utilizes the effect.
Almost all of the Kyoritsu AC/DC clamp meters and clamp sensors employ the Hall element.

Harmonics

Power line AC voltage from a utility company has near sinusoidal waveform of fundamental frequency with little distortion. When only a load consisting of resisters, capacitors and coils, called a linear load (its constant is fixed regardless of the amount of current flowing through it), is connected to mains supply, no distortion is introduced into the load current waveform. However, when a non-linear load, such as a semiconductor and a saturable reactor, is connected, distortion appears in the load current waveform. The current with a waveform containing distortion, or harmonic current, flows in the direction toward the low impedance side and in the process, produces voltage drop over the impedance of the current path, causing the load voltage also to contain harmonics.

Indicated Value

The value indicated by a tester for a measured quantity

Peak Hold

A function to memorize the peak value over a certain period of time.
*Response time is normally approx. 10ms.
Reading in the peak hold mode are two types. (the peak of current crest value and the peak current value multiplies by $1/\sqrt{2}$)

Peak Value

The value at a point where a waveform has the maximum amplitude.

Resolution

The minimum increments in which a tester can take measurements.

Sample Rate

Frequency at which an A/D converter circuit senses the quantity to measure: typically, twice or three times per second.

Sensitivity

The ability of a tester to respond to the quantity to measure, expressed as the ratio of a change induced in the reading to a change in the input:

$$\text{Sensitivity} = \frac{\text{Change in reading}}{\text{Change in quantity to measure}}$$

Shock Hazard

Also referred to as electric shock. When a person touches a motor that has a "leak", a path can be created from the motor frame to the hand, body and feet of the person to the floor he is standing on to allow a current to flow through it, sometimes resulting in a fatal accident.
The seriousness of a shock hazard widely varies depending on the amount and duration of the current that flows through the person' s body. His constitution, age and medical condition are also variation factors, but in general, at a frequency of 50 or 60Hz, stimulus to the skin is felt at 1mA, considerable pain occurs at 5mA, pain is unbearable at 10mA, there is difficulty in releasing the "leaking" object because of intense muscle contraction at 20mA, it is considerably dangerous at 50mA and fatality is likely at 100mA. For the safety limit for a fatal current, which causes ventricular fibrillation, Professor Dalziel proposed the following equation from numbers of experiments on animals.
$I = 165\sqrt{t}$
Where, I = current (mA) and t = time (sec).
From this theory, the maximum duration for a current of 165mA is 1 second.

Thermocouple

A device that uses the voltage developed by the junction of two dissimilar metals to measure temperature. One junction, called the measuring junction, is placed at the point where temperature is to be measured. The other junction, called the reference junction, is maintained at a reference temperature. The voltage developed between the two junctions varies depending on the difference between the temperatures of the two junctions and the type of thermocouple.

True RMS Value

The square root of the average of the square of a periodic waveform's instantaneous values taken over one cycle. It is also called the rms value and the most closely relates to such form of energy as force and heat.
(The effective value of an alternating current is expressed as the value of the direct current which produces the same amount of heat as the alternation current does.)

For sinusoidal wave :
True RMS = Maximum value × $1/\sqrt{2}$= Maximum value × 0.707

When a True RMS is 100V ;
Maximum value = True RMS × $\sqrt{2}$= 100 × 1.41 = 141(V)

Measurement categories

To ensure safe operation of measuring instruments, IEC 61010 establishes safety standards for various electrical environments, categorized as O to CAT Ⅳ, and called measurement categories. Higher-numbered categories correspond to electrical environments with greater momentary energy, so a measuring instrument designed for CAT Ⅲ environments can endure greater momentary energy than one designed for CAT Ⅱ .

O : Measuring circuits without a MEASUREMENT CATEGORY.
CAT Ⅱ : Electrical circuits of equipment connected to an AC electrical outlet by a power cord.
CAT Ⅲ : Primary electrical circuits of the equipment connected directly to the distribution panel, and feeders from the distribution panel to outlets.
CAT Ⅳ : The circuit from the service drop to the service entrance, and to the power meter and primary overcurrent protection device (distribution panel).

KTA02	4mm rubber caps [2pcs/set]	79

QUALITY CONTROL CONCEPT

Kyoritsu started early an effort to establish system that ensures traceability to the national standards in order to produce reliable instruments as well as instruments that can assure reliability of other equipment and installations.

When traceability is in place, measurements taken with an instrument any time and anywhere in any situation can be related to the appropriate national measurement standards through a clear and unbroken chain of comparisons.

For example, in terms on measurement defined by JIS (Japanese Industrial Standards), traceability is specified as a condition in which a calibration path is established from instruments produced or in-house standards to higher level standards to the national standards. Kyoritsu currently has a system in place as shown in the figure below.

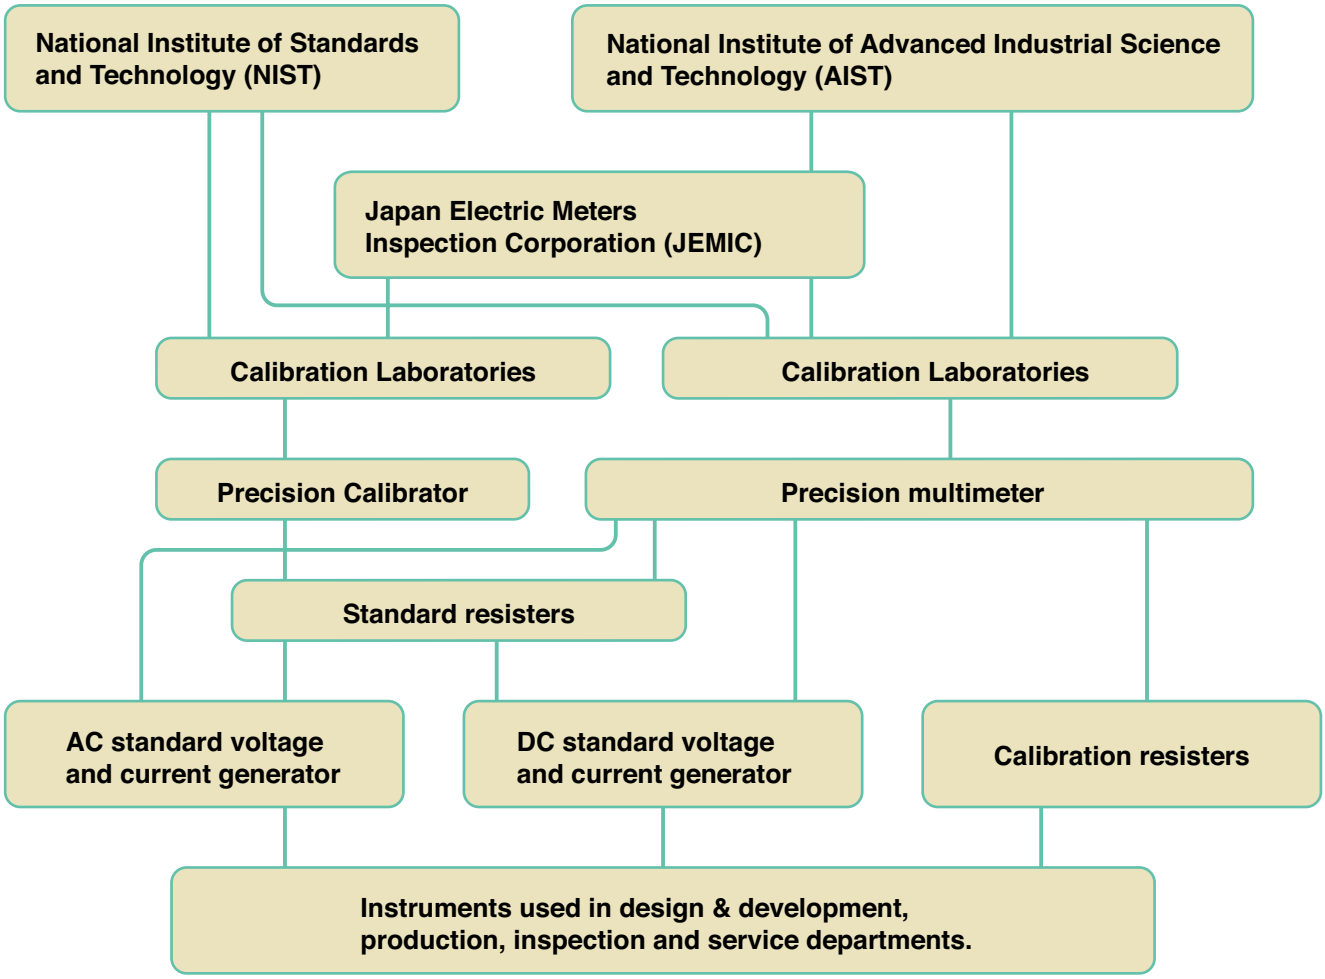
Our calibrator (standard) is calibrated at Japan Electric Meters Inspection Corporation (JEMIC), Japan Quality Assurance Organization (JQA) and Fluke Japan who perform calibration based on the units established and maintained by National Institute of Advanced Industrial Science and Technology (AIST). The standard is used as the in-house standard to calibrate all the test and measuring equipments which are used in-house.

Voltage : Precision calibrators are used as in-house DC and AC voltage standards.

Current : DC or AC current is converted to a voltage by a standard resistor, and the voltage is calibrated with a precision digital multimeter.

Resistance : Calibration resisters are calibrated with a DC standard current generator and the precision digital multimeter.

Calibration System for Electrical Measuring Instruments



CE Marking:signifies conformance to
EMC directive (2014/30/EU)
LVD directive (2014/35/EU)
RoHS directive (2011/65/EU)

Safety Warnings :

Please read the "Safety Warnings" in the instruction manual supplied with the instrument thoroughly and completely for correct use. Failure to follow the safety rules can cause fire, trouble, electrical shock, etc. Therefore, make sure to operate the instrument on a correct power supply and voltage rating marked on each instrument.

For inquires or orders :
